TRANSCRIPT OF THE AUDIO RECORDING OF:

One America News Network

February 11, 2021

Vol. 1

TRANSCRIBED BY: THOMPSON COURT REPORTERS INC.

1 STEVE BANNON: Welcome. Hey, tonight, it's Stephen K.  
2 Bannon, we're going to have Mike Lindell, this is the film  
3 Absolute Proof. We're going to kind of deconstruct it tonight  
4 like, like NFL or college, a game film, go through, it's the  
5 most controversial film in the world, it's being suppressed by  
6 the social media giants, the big tech giants, and also the  
7 mainstream media. So Mike Lindell, he's agreed that tonight  
8 we're gonna go through, I'm gonna ask the tough questions. And  
9 we're gonna see exactly what this film is, and the evidence  
10 that backs it up. The movie is Absolute Proof. Mike Lindell,  
11 Mike, it took you a while to kind of get here, you came on the  
12 scene back in 2016 and then you had some other involvement  
13 with President Trump that you actually saw what happened, when  
14 anybody gets involved on a national political stage, what's  
15 happened. So I think we've got a couple of pictures and clips,  
16 we want to show at the very beginning, I'd like you to respond  
17 to those so then we can kind of get into the film, and people  
18 can understand, this, really this beatdown you're getting from  
19 the mainstream media, and the beatdown you're getting from the  
20 big tech oligarchs. Can we play, show the first, can we show  
21 the first picture?

22 MIKE LINDELL: Yeah, now this picture here. You got,  
23 everyone's got to realize I knew nothing. Can we, I'm sorry,  
24 start that over. I'll just keep, should I just keep talking?

1 Okay. So, So what you're, so what you're seeing here is a  
2 picture of, of the president before he was president. This is  
3 the summer of 2016. I had never met Donald Trump. I was an  
4 ex-addict, ex-crack-addict, you know, God freed me of that  
5 January 16, 2009. So I had never, I didn't really pay  
6 attention to politics, I didn't know much about him. And he  
7 reached out to me, we had that private meeting, for about a  
8 half hour. He said, Mike, you, you do your manufacturing here,  
9 I want to bring the jobs back. And, and we talked about, yeah,  
10 I was an ex-addict and I said, I'm going to have this Recovery  
11 Network, it's going to help millions. He says, I'm going to  
12 stop the jobs, or I mean, the drugs pouring in. And we had  
13 these amazing back and forth conversation. But when I left  
14 there, I'm going wow, he said, he has no agenda other than to  
15 help this country and he actually listened to a business man  
16 of, you know, took his input. And I walked out of there, he's  
17 gonna be the greatest president ever. But I went and talked to  
18 his employees and each one of them said the same thing, great  
19 boss, great guy, had done something for them personally. So I  
20 did my due diligence to make sure what I just seen was, you  
21 know, was amazing, and I got back to Minnesota, and this is  
22 very key. I couldn't wait to tell the media and to tell  
23 everyone what I just experienced there and how, you know, you  
24 got to get behind this guy is going to be the best. And, and I

1 ended up doing a press release against my board's advice, they  
2 said, don't do that, we're going to get, you know, you're  
3 going to lose half our customers, I said, and I actually  
4 walked out of the boardroom and one of my, one of the gals  
5 came out, she says, we didn't get this, all this way by you  
6 not listening to God. And I went back in there, and I said,  
7 we're going to do this press release. And I did it. And I, it  
8 was crickets, and then it happened. I was attacked in social  
9 media, I was called a racist, I was called stuff I can't even  
10 say here by these pots and bots and trolls, but I thought they  
11 were real people. I thought they were real people and it just  
12 hurt me, I'm going, what did I do? You know, I just, I didn't  
13 even say what we had talked about. So, but I did find out, you  
14 know, I found out, wow, they're not real people, you know, and  
15 they were just these robots that they do an attack. But I  
16 didn't know that at the time, it was very, very a learning  
17 experience. And, and it's still, you know, some of them were  
18 real, because they would jump on the bandwagon. But, but that  
19 was my first experience. And then, then because I have four  
20 now, this is the fourth one. The second one was last spring,  
21 which I, we had, I spoke at the Rose Garden. And I think we  
22 have that clip.

23 MIKE LINDELL (IN VIDEO CLIP): God gave us grace on  
24 November 8th, 2016 to change the course we were on. God had

1 been taken out of our schools and lives, a nation had turned  
2 its back on God. And I encourage you to use this time at home  
3 to get, to home to get back in the word, read our Bibles and  
4 spend time with our families. Our president gave us so much  
5 hope, where just a few short months ago, we had the best  
6 economy, the lowest unemployment and wages going up. It was  
7 amazing. With our great President, Vice President and this  
8 administration, and all the great people in this country  
9 praying daily, we will get through this and get back to a  
10 place that's stronger and safer than ever.

11 STEVE BANNON: So Mike, tell us what happened after  
12 that, after you read some Bible verse and talked from your  
13 heart in the Rose Garden, how intense was the blowback then?

14 MIKE LINDELL: It was, it was beyond belief.  
15 Everyone, nighttime talk show hosts, people on CNN, Mike  
16 Lindell talked about the Bible from the, talked about spending  
17 time with our families, talked about getting in the word. You  
18 would think I killed somebody. They just attacked me  
19 relentlessly. I did 109 interviews in five days. Now granted,  
20 there was all the people over here that, you know, everyone's  
21 going you know, it was like almost like one over here they'd  
22 stick up for me but that once again was bots and trolls, there  
23 were even real people, the news media, the mainstream media,  
24 they were the biggest attackers there and the nighttime talk

1 show hosts, they all just piled on like it was the worst thing  
2 you could ever do. And I thought, okay well what did I do? Is  
3 that so bad reading our Bibles, getting a nation that turned  
4 its back on God and spending time with our families. And so  
5 that was my second thing. And then the third time was this  
6 summer and this, where I had, a guy who called me up and he  
7 had a, he had a [inaudible] that would help the, everyone was  
8 call me for everything to help this vaccine, or I mean the  
9 virus, and masks, I got so much involved with this, with this  
10 virus and here this guy came to me says hey, this stuff works.  
11 And so I went on CNN, because it had leaked, it had leaked to  
12 them and I thought it was just gonna be a friendly three  
13 minute, four minute interview and here's what happened.

14           ANDERSON COOPER (IN VIDEO CLIP): How are you  
15 different than a snake oil salesman?

16           MIKE LINDELL (IN VIDEO CLIP): Now these were  
17 testimony - -

18           ANDERSON COOPER (IN VIDEO CLIP): You're willing to  
19 promote anything, I don't even know who you are, you really  
20 are like a snake oil salesman - -

21           MIKE LINDELL (IN VIDEO CLIP): I don't think that,  
22 this saved their lives if I didn't believe in this product - -

23           ANDERSON COOPER (IN VIDEO CLIP): You don't have a  
24 great reputation. You don't have a great reputation.

1 MIKE LINDELL (IN VIDEO CLIP): Oh really? You're in  
2 my prayers Anderson --

3 ANDERSON COOPER (IN VIDEO CLIP): Oh sir.

4 MIKE LINDELL (IN VIDEO CLIP): -- to lower me from an  
5 A+ to an F - -

6 ANDERSON COOPER (IN VIDEO CLIP): -- just sad, that's  
7 sad.

8 MIKE LINDELL (IN VIDEO CLIP): It is sad. Like that  
9 out there, that they --

10 ANDERSON COOPER (IN VIDEO CLIP): For a man who  
11 professes his faith, for you to lie like this is really  
12 extraordinary. To me --

13 MIKE LINDELL (IN VIDEO CLIP): The FDA, the FDA has  
14 all these studies.

15 ANDERSON COOPER (IN VIDEO CLIP): -- that is just a  
16 complete lie, that is a bold-faced lie --

17 MIKE LINDELL (IN VIDEO CLIP): -- all solutions.

18 ANDERSON COOPER (IN VIDEO CLIP): -- because you're,  
19 you're a snake oil salesman telling people take this product,  
20 --

21 MIKE LINDELL (IN VIDEO CLIP): Well you're calling  
22 me, you know you're calling me names. When did you come to  
23 take anything? I, I, know I don't, you know that's why --

24 ANDERSON COOPER (IN VIDEO CLIP): -- you're

1 desperate, you're desperate. It's kind of morally bankrupt.  
2 You know how to sell something you know how to promote a  
3 product, I guarantee you I would not be taking medical advice  
4 from you, sir. I can promise you that. Nothing you can say - -

5 MIKE LINDELL (IN VIDEO CLIP): -- and I will say let  
6 me finish my answer.

7 ANDERSON COOPER (IN VIDEO CLIP): I just think it's  
8 shameful what you're doing. You know you make money  
9 manufacturing masks, right?

10 MIKE LINDELL: No, I gave away \$4 million dollars out  
11 of my own pocket, that's a fallacy.

12 ANDERSON COOPER (IN VIDEO CLIP): Well that's nice.

13 MIKE LINDELL: 4 million dollars, 4 million dollars  
14 and you can check those facts. Four million dollars out of  
15 Mike Lindell's pocket donated. I'm praying that, for you,  
16 Anderson that you have me back on your show.

17 STEVE BANNON: So Mike, that's a pretty intense,  
18 that's what we call a pretty tough interview. But that's, it  
19 really even with that intensity, that, that's nothing for  
20 what's happened to you over the last couple of weeks - -

21 MIKE LINDELL: Yeah and you know, and back then what  
22 was so bad I had, back then, you know, he's attacking me for  
23 the myoleander.com, he's attacking me for something. All these  
24 things I was doing, was just good things. What was wrong with

1 that? And now, you take all three of those times, multiply it  
2 by 10. And then times it again by 10. This is what's happening  
3 right now to me, to my company, to my family, to my, to my,  
4 you name it. To me personally, they're going after my  
5 reputation, they're boycotting. I mean, it's just across the  
6 board. Social media has, I mean, Twitter, Twitter's taken me  
7 down and my company. Google suppressed my AdWords, I can't  
8 even buy my own name to buy an AdWord, they, after spending  
9 20,000 dollars last Friday, when this Absolute Proof came out,  
10 I was kept bidding on my own name against nobody. Finally it  
11 got up to a dollar a click if somebody wanted to find it. And  
12 they shut it down said no, because they're probably going, you  
13 know - -

14 STEVE BANNON: Mike, I want to get into the film. But  
15 here's a question at the start of it, we're going to ask some  
16 tough questions, ask you to share some more evidence. But  
17 here's what people want to know, are you going to back off? Is  
18 Mike Lindell, you're being attacked non-stop, they're  
19 attacking your company, they're attacking your Recovery  
20 Network, your family, your vendors, your employees. Is, to  
21 start this film off, what people want to know, are you going  
22 to back down one inch about trying to get the truths out  
23 there?

24 MIKE LINDELL: Never. Absolutely never. This isn't

1 about, I don't care if you're a Democrat or Republican. This  
2 was an attack on our country, these Dominion machines and  
3 Smartmatic, these machines that were, that are, that were  
4 this, that were the tools of this attack, and we will never  
5 have another fair election if we don't, if we don't stop that,  
6 so I will never back down.

7 STEVE BANNON: Okay, so you're not gonna back down.  
8 Let's start the film, we're going to come in at different  
9 breaks in the film, explain what happened, talk about more  
10 evidence, ask you a few tough questions. So let's get into it.

11 MIKE LINDELL (IN VIDEO CLIP): Hello everyone, this  
12 is Mike Lindell, the CEO of MyPillow. As you all know, I have  
13 been attacked the last month, relentlessly on social media, by  
14 newspapers, by TV shows, by you name it, I've been attacked,  
15 in myself, not just myself, but my company. The boycotts that  
16 are going on, box stores are dropping me. Social media, they  
17 cancel my Twitter. Today, they cancel MyPillow's Twitter  
18 account, my company's Twitter account. Well, before I was  
19 going to get erased completely, we put together this show. And  
20 what you're going to see today is what they don't want you to  
21 see, why they're trying to erase me. And what I've told  
22 everyone out there is, you know, what, I seen evidence. I've  
23 been trying since November 4th, to prove, you know, to show  
24 what's out there. Why, why are these deviations that happened

1 on election night? It nothing, none of it made any sense. So I  
2 dove all in with everything I had, resources, anytime I heard  
3 something that maybe was relevant, I went and said, you know,  
4 looked into it, did my own due diligence, had my, even my own  
5 investigations. Well, on one day, I think it was like January  
6 9th, all of a sudden, these people, they brought me some, a  
7 piece of evidence, that's 100% proved. It's like a print of  
8 inside the machine of the timestamp that showed another  
9 country, other countries attacking us, hacking into our  
10 election through these machines, and it shows a vote's  
11 flipped. And I'm going wow, I got to get this out there. And  
12 from that point on, I started putting it out there and that's  
13 when they just started attacking me. Well, they obviously, are  
14 hiding something, and tonight, you're going to see what  
15 they're hiding, you're going to see on this show. We have,  
16 we're going to have cyber forensic experts, we're going to  
17 have 100%, you're going to see all this evidence that by the  
18 time you're done seeing it you're going to go wow, 100%, it  
19 proves exactly what happened, that these machines were used to  
20 steal our election by other countries, including China. But I  
21 do want to tell you, before we get into all that, I want to  
22 tell you what I consider why I'm so happy today, about two  
23 miracles that happened these last couple months. The first  
24 miracle was on election night. And on election night, 11:15 at

1 night, the, the algorithms of these machines broke, basically  
2 broke, and all like this will be explained during this show.  
3 But they broke. What that means is Donald Trump got so many  
4 more millions of votes that they didn't expect that they had,  
5 they're going to have to go recalibrate, right? So that's why  
6 all these states shut down, all of a sudden, they all shut  
7 down. And we're all going what, that's weird. This has never  
8 happened in any other election. And then we're going okay, and  
9 then they as the days went on going, what? Another, another  
10 week that it takes, you know, like Arizona to count 1% of  
11 their vote and, and you see these big spikes, like in Michigan  
12 and all these big, you know, votes that were poured in. Nobody  
13 understood it, right? We're like living in this kind of  
14 Twilight Zone during that time. Well, that is one miracle  
15 there. Because think of that wouldn't have happened, think if  
16 they would have estimated right and what would have happened  
17 is, it would have been just like a normal election at three in  
18 the morning, they would have said, "Oh, Biden won, he won by a  
19 little bit," and we would have said, "Oh, better luck next  
20 time." But because he got so many votes, it broke that and set  
21 off this series of events of these deviations. If that  
22 wouldn't have happened, we would have never been here talking  
23 about biggest attack in history, the biggest cyber attack  
24 ever. And this is, you know, the American dream would be gone

1 forever because we would have never known and it would just  
2 you know, using machines that would have took us over forever.  
3 Here comes the second, the second miracle. And with this one,  
4 I gotta show you here on the, on the on the chart. I'm going  
5 to go through these and I'm going to tell you why this is a  
6 miracle. Okay, what we're going to do here, we're going to go  
7 state by state and we're going to show you what else happened.  
8 So here's Arizona, okay, the margin of victory was 10,000  
9 votes that, that Biden, they say Biden won. Now if we look at  
10 this, let's go down the chart here. Mail-in ballots requiring  
11 adjudication, almost 300,000. But these mean, these are votes  
12 that they put through and you're gonna learn that, you're  
13 gonna learn all about that during this show too and  
14 adjudication, how that works, but let's just go to the next  
15 one. Illegal aliens voting, 36,400 illegal aliens voted. You  
16 see that? He only lost by 10,000. Boy, of course they can't  
17 vote. Okay, Donald Trump wins Arizona, right? We'll just keep  
18 going. Voters registered to a vacant lot, 2,000. Completed  
19 mail-in ballots received the day before the ballots were even  
20 mailed. They got 20, or 22,000 ballots back in Arizona before  
21 they had even mailed the ballots out. What? That's kind of  
22 bizarre, right? Okay, keep going. Down here, Maricopa County  
23 electronic adjudicated ballots, 103,000 votes loaded before  
24 opening of polls. So the votes were even loaded. They were

1 already in there before the polls even opened, 50,000. Okay,  
2 let's just, you see all that. Let's go to the next state here.  
3 I'm going to skip Georgia and come back to it. Scroll to  
4 Michigan, Michigan dead voters 17,367. And this is so,  
5 Michigan is kind of its own, we're going to talk about  
6 Michigan. It's very different than the other states, what went  
7 on there. So it's all grouped together, 615,000 votes that are  
8 just in question, and we're going to skip that part, okay.  
9 Let's go the next one here, Nevada. Okay, here's Nevada.  
10 Illegal aliens have voted in this election, 4,000. Mail-in or  
11 absentee ballots for voters that were known to have voted in  
12 other states, 15,000. Clark County use signature verification,  
13 one out the image quality that was suggested by the  
14 manufacturer and to check the mail-in ballot signatures,  
15 130,000. We'll just skip through that. Raffle tickets that  
16 they were incentivized, 500. Here we go, here's a big one,  
17 dead people who voted, 1,506. Non-Nevadans who voted in  
18 Nevada, they don't even live in Nevada, 19,218. Voters who  
19 double voted, 42,284. Okay, as you can see, they add up to  
20 over 200,000. Donald Trump lost by 34,000 votes. Okay, let's  
21 go to the next one, Pennsylvania. Mail in votes are counted  
22 without a Republican observer. We all heard that stuff, that's  
23 well over 600,000. Mail-in ballots, 68. Here's another one  
24 too. We could almost come, we're gonna, you're gonna hear a

1 lot about this during this thing. But let's go down, poll  
2 workers that voted with various errors in the bins. This is  
3 the one where you heard the fake ballots that were driven from  
4 New York to Pennsylvania. You'll hear a little about that in  
5 the show too. But this is, we're going to go peg Pennsylvania,  
6 you can all see it adds up to 866,000. Donald Trump lost by  
7 68,000. And there'll be a point to all this I'm getting to.  
8 Okay, here's Wisconsin. Wisconsin, surge of by identity  
9 combined voters in 2020. That's, it's, that would take a while  
10 to explain but there was 130,000. US Postal Service backdated  
11 ballots 100,000. Okay, that's incredible if you actually look  
12 into it. The mail-in ballots entering the tabulation  
13 price under the guise of absentee ballots in clear  
14 violation of state law, 170,000. Okay, Wisconsin, the margin  
15 of victory for Biden was 20,000 votes. Now we're gonna go to,  
16 back to Georgia. Okay, everyone knows the president called the  
17 Secretary of State in Georgia. And on that call, he said, he  
18 was listing these to the Secretary of State. He said, okay,  
19 you have felons with incomplete sentences that voted and cast  
20 their vote, 2,560. Underage children that registered to vote  
21 and illegally voted, 66,247. Unregistered voters who  
22 voted, 2,423. Registered voters who voted in another state  
23 after their Georgia registration date, 4,926. Voters who voted  
24 in Georgia and also voted in another state, 395. Voters who

1 voted in Georgia but changed their address before the election  
2 to do it, 15,700. People who failed to pre-register to vote in  
3 their county in time after moving from one county to another,  
4 40,279. Voters who illegally claimed a post office box as  
5 their resident, 1,043. Voters who registered too late to vote  
6 in the election, 98. People who died prior to the election,  
7 they didn't, they were already dead, 10,315. Okay, ballots  
8 with no chain of custody, we'll probably talk a little bit  
9 about that in this show too, 600,000. And here's what the  
10 President said to the Secretary of State in Georgia. Can you  
11 just give us, why don't you just give us your, it's only 10,  
12 he only lost by 11,730 votes, he said, how about you just give  
13 us your underage that voted or your dead people and we win. It  
14 didn't make sense. You say how about this? This, this line  
15 here? This people who have failed to register, 40,000. Can you  
16 just give us them? He said just get, what, he named the  
17 columns. And you know what the Secretary of State of Georgia  
18 said, those numbers are wrong. And, and the President said,  
19 well, where, what, who gave us the numbers, he asked his guy  
20 and that guy said we got them from the Secretary of State's  
21 office. And the President said to the Secretary of State,  
22 well, when can we get the right numbers? And the other guy  
23 said, sir, we've been trying to get them from the Secretary of  
24 State for almost two months. And the point being here, now

1 here comes the point I'm making, here's, this is all the  
2 second miracle of the election. Every one of these states  
3 should have been, and two plus two is four, right? You should  
4 say, okay, you can't count dead people, you can't count  
5 underage people. Every one of these states, Donald Trump wins  
6 if the electors would have done their job, the legislators, if  
7 the, if the governors wouldn't have said, you know, hey it's  
8 good. All these things that happened, all these anomalies that  
9 happened that would've never happened before, but, but much  
10 less one state, they all say that, that, hey, we're going to  
11 go ahead and use this stuff and we're going to declare Joe  
12 Biden the winner. But here's the big thing, the big miracle,  
13 if they would have done that, if they would have done that,  
14 and said, you know what? If we can't count these, Mr. Trump  
15 wins, Donald Trump wins, okay, then we wouldn't be where we're  
16 at right now. Because the biggest thing against humanity, and  
17 our country is this attack through these machines, they got  
18 this opened up, this revealed, the, the machines to where  
19 we're at right now. So what you're going to watch during this  
20 show, is 100% proof that the big thing was the theft by these  
21 other countries that came in to attack our country, through  
22 these machines that are made to steal elections. Every  
23 election going forward in history, if these things would have  
24 happened, these two, and we wouldn't have, we would have never

1 known, every single vote you would have ever made wouldn't  
2 have mattered. Somebody else would have made that vote. And  
3 we've all seen in this past month, you think it was a  
4 communist coming in and taking us over, with people here, this  
5 is an attack not only on other, those other countries with  
6 communism, but they had domestic traitors right here in our  
7 country. Whatever's going on right now we're seeing it.  
8 They're suppressing cancel culture. They're trying to cancel  
9 us all out. I just seen churches, the Christian churches,  
10 they're being attacked right now. People on social media,  
11 anyone that speaks up, they're going, you can't say that,  
12 you're gone. It's like they're, right now they're doing  
13 whack-a-mole because they know, they knew they were so close,  
14 so close that we would never know in history, what happened.  
15 But guess what, now we do know it, and you're all gonna know.  
16 And when you watch this, and you get through it, at the end,  
17 I'm going to tell you what you can all do. And we're going to  
18 start our show right now and you guys are going to be  
19 absolutely amazed.

20 STEVE BANNON: Okay, there was a lot to go through  
21 there, Mike. But before we get to the numbers, because  
22 remember, Congressman Eric Swalwell, in the, in the well of  
23 the Senate on the opening day of the prosecution said that all  
24 these numbers are lies. Donald Trump lied about all these

1 numbers, that all this stuff about voter fraud, and, you know,  
2 illegal aliens voting and underage people voting and people  
3 dead people voting, it's all made up, it's all nonsense. So  
4 you talk about two miracles in the section, explain that, why  
5 that's so important., then I want to ask you about the math.

6 MIKE LINDELL (IN VIDEO CLIP): Okay. Well, first, I  
7 want to say all the numbers I have came from the Secretary of  
8 States, these were validated numbers. But what I want to  
9 talk about, the, the two miracles that I brought up here is  
10 the first miracle was the night of the election. At 11:15. it  
11 broke the algorithms in the machine because they didn't expect  
12 Donald Trump would get millions more votes than what they  
13 predicted. By doing that they didn't have enough track left to  
14 to do the steal, because he would have won anyway. Now, if  
15 that happens, if they predicted right, at three in the  
16 morning, all the states would have been in, everybody went to  
17 bed and say, oh boy, we made it close, better luck next time.  
18 But by them breaking that, everybody had to go into  
19 reactionary mode. So you see these big deviations, this big  
20 spike in Michigan and Arizona taking a week to count the last  
21 1% and Georgia taking who knows how long, these were all  
22 deviations. But we would, if, so that 's miracle number one.  
23 If that didn't happen, we would have never known about the  
24 machines. Now the second miracle is this, all these stats you

1 see of the dead people and all these on the board here. If,  
2 let's just say that they're 100% accurate. Donald Trump would  
3 win and it would, and he would have been put back into place  
4 as the rightful winner. But I'm saying that I'm glad he  
5 didn't, because if he did, we would have never known the big  
6 gorilla in the room is the machines that would have stole our  
7 elections forever. We wouldn't, we wouldn't be where we're at  
8 right now. So by everybody not doing their jobs, the  
9 legislators, the governors, the Secretary of State, that's a  
10 miracle that they all did the same thing and did nothing. They  
11 did nothing, because that's why we're here tonight to show you  
12 that the big theft is the machines and an attack on our  
13 country. That's the miracle, if that all wouldn't happen, and  
14 I know that's a twisted way to look at it, but it's true.

15 STEVE BANNON: But, but on January 6th, they're  
16 making the scene that they impeach President Trump. If you go  
17 back and you look at your numbers, whether it's Wisconsin at  
18 20,000 votes, Georgia, I think at 12,500, Arizona at around  
19 8,300. There's enough, there's enough just in the low-hanging  
20 fruit, just in the traditional voter fraud, you would agree  
21 that if you press the case here, leave the machines aside,  
22 you're right, the machines are an issue you want to deal with,  
23 because you got to get them out of there for future elections.  
24 But just with the math you have, if you can prove that Eric

1 Swalwell is wrong and these numbers are right, Donald Trump  
2 would be President of the United States, you agree with that?

3 MIKE LINDELL: 100% I mean he did it in Georgia when  
4 he talked to Brad Rutherford or whatever his name,  
5 Raffensperger. I mean that was, everyone, the whole country  
6 heard that and we're going, the President's going, just give  
7 us you're, how about your dead people and your minors that  
8 voted.

9 STEVE BANNON: But, but Mike you got to answer for  
10 the audience I think why is Raffensperger and these election  
11 officials in Arizona, in Georgia, why are they not stepping up  
12 and agreeing with you and MAGA and myself and others, say yes,  
13 there is traditional voter fraud of such an extensive thing  
14 like underage voting, illegal alien voting. Why are they not,  
15 why are elected Republican officials, why don't they agree  
16 with Mike Lindell?

17 MIKE LINDELL: Well, you know what, I'm glad they  
18 don't because if they did their job Donald Trump would, we  
19 wouldn't be here talking and then the world would have been  
20 over because no election would be safe ever again because what  
21 you're gonna see here tonight. I don't know why they're did  
22 it, I can only, I'm telling here tonight to tell the facts.  
23 And I could be, I could, oh believe me, I could, I could give  
24 you all kinds of opinions on Brian Kemp and Doug Ducey and all

1 these Republicans and these, and these Secretaries of State.  
2 But I'm not here, I want you to see tonight is 100% fact and  
3 that's what I'm going to put out there. But whatever reason  
4 they did it, that will all come out, that's, that's a, you  
5 know that's all going to come out. Why did you do this to the  
6 American people? Why did these people, and you're going to  
7 find out with watching our show tonight, this attack by China  
8 and this coming into our country but there were people here in  
9 the United States that were their partners and I don't know  
10 who's whose partner whatever, that's not from, my, my thing is  
11 to get, to 100% show you that this attack happened came  
12 through the machines and there was a massive flip and you will  
13 never have an election again if you use these machines.

14 STEVE BANNON: Okay, Mike now we're gonna get into  
15 the cyber warfare, the cyber attack part of this film with  
16 Colonel Waldron and others. Let's go to, let's let's go to  
17 the, let's go back to the film, Absolute Proof with Mike  
18 Lindell, you're gonna see Colonel Waldron right now.

19 MIKE LINDELL: And now we have with us Colonel Phil  
20 Waldron.

21 COLONEL PHIL WALDRON: Yeah, so my, my background in  
22 the military is with influence operations, information  
23 operations, information warfare, if you will.

24 MIKE LINDELL: You know, what we're talking about

1 here today is specific, these machines that were used to, to  
2 hack into our election and, and by foreign countries,  
3 including China, and what, what did you, kind of bring us up  
4 through the election for yourself and what, and then how  
5 you've gotten so involved right now.

6 COLONEL PHIL WALDRON: Yeah, we began looking, working  
7 with our partners in Dallas, at Allied Security Operations  
8 Group with doing some analysis on the data that they had,  
9 looking at not only Dominion, but ES&S and Hart, several of  
10 the other electronic voting management systems. And we saw a  
11 lot of similarities and vulnerabilities in the systems that  
12 would be easily influenceable or easily interdicted. And  
13 again, as a, as a information warfare officer that's what I  
14 did. I looked for vulnerabilities and ways to attack systems  
15 to create a strategic advantage for US friendly forces. And so  
16 when we started seeing the vulnerabilities, and all the  
17 different ways that you could interdict this, these electronic  
18 voting systems, it became apparent that we had a problem for  
19 the November 3rd election. And that prompted us to spend a lot  
20 of time working with Russ Ramsland, getting a lot of the  
21 historical data, the knowledge, and we started working on our  
22 own, really doing a lot of connecting the money exercises,  
23 doing, doing basic investigative research. And then I brought  
24 in our our local DHS team here in Texas, both the intelligence

1 and assessments division, which collects, it collects  
2 intelligence for, for the Department of Homeland Security and  
3 the CISA, our local CISA rep. And we spent quite a bit of time  
4 giving them an introduction to what, what we saw and the  
5 vulnerabilities and the ways that these systems could be  
6 interdicted to change election outcomes at you know, the, the  
7 machine level, the server level, fraud at the local level,  
8 which you know, is required to induce the the illegitimate  
9 ballots. Then you got the machine level, which is kind of what  
10 you were talking about, the algorithms that are directly input  
11 into the tabulators. And we have evidence of that in, in Ware  
12 County, Georgia, that, you know, X amount of ballots went  
13 through, and they basically stole 13% of the vote from  
14 President Trump and put that 13% of the vote into the category  
15 for former Vice President Biden, which made a 26% shift in the  
16 vote. And so when you look at the machine level, the machine  
17 for Dominion or ES&S, there are so many vulnerabilities in the  
18 systems, there are so many fundamental cybersecurity practices  
19 that are not enabled, that it basically allows anybody who has  
20 some technical ability, and the, the want-to to go and  
21 influence our elections. And sort of that strategic level is  
22 foreign intelligence, foreign intelligence services. And we've  
23 got pretty much document, documented Chinese, Communist  
24 Chinese Party ownership of the private equity firm, whose

1 board controls Dominion. We've got Chinese communists, the  
2 president of the Chinese Communist bank, who is a board, board  
3 of directors member of the private equity firm that, that owns  
4 Dominion.

5 MIKE LINDELL: Wow.

6 COLONEL PHIL WALDRON: And if you, the testing company,  
7 the only company that has code, the access to the code, and  
8 the testing for Dominion is in Shenzhen, China. It's a  
9 Communist Chinese Party company. The US government, the state  
10 governments, the county governments, they don't have access to  
11 Dominion code. But I think it's kind of, kind of unique that a  
12 Chinese company that's run by the CCP does have access to the  
13 code. And that's why we started seeing that that strategic  
14 level, that third tier of election manipulation, a lot of  
15 movements of votes, directly, direct access to Pennsylvania  
16 voting precincts, county tabulation centers, Wisconsin,  
17 Michigan, Nevada, Arizona, Georgia, all of that coming in  
18 directly from foreign countries, China being the predominant  
19 one, and through, through Pakistani ISI proxies.

20 MIKE LINDELL: Did you find it very frustrating not  
21 being able to get, get all this information out to the public?

22 COLONEL PHIL WALDRON: Yeah, it's, it's very frustrating.  
23 The fact that, you know, everyone says, well, there was all  
24 these court cases, and all the court cases were lost. Well,

1 that's a lie. And when we get statistics on how many court  
2 cases are open, how many were dismissed for, you know, for  
3 standing or procedural, but there's only to my knowledge, two  
4 cases, one in Michigan and one in Georgia, where evidence has  
5 been heard. And those cases are progressing forward. The  
6 Senate in Arizona has heard and seen preliminary evidence, and  
7 they've issued subpoena, and they're pressing forward with a  
8 full forensic audit in Arizona, and that, that could be  
9 forthcoming as early as you know, this, this coming week. So  
10 it's, it's, it is complex, and it's hard for people to  
11 understand and if it's hard to understand, people just dismiss  
12 it as, you know, conspiracy theory, where it's cyber warfare  
13 and unconventional asymmetric warfare conducted by a peer  
14 threat nation-state, against the United States government  
15 critical infrastructure.

16 MIKE LINDELL: The whole country seen when they, you  
17 know, when they shut everything down at night that that was a  
18 deviation, you probably expected this right?

19 COLONEL PHIL WALDRON: We were watching, we found the  
20 foreign servers in Barcelona, in the UK, and in Frankfurt.  
21 We'd seen several, you know, the one in Toronto, obviously,  
22 with Dominion.

23 MIKE LINDELL: So, you know, 100% proof, that the  
24 servers are overseas in other people's countries for our

1 election?

2 COLONEL PHIL WALDRON: Yes, we were mapping out the  
3 servers before the elections. We identified the Scyt1 server  
4 in Frankfurt, down to the street address. Frankfurt has, I  
5 think it's, it's either the largest or one of the world's  
6 largest server nodes, you know, a cyber node, a communications  
7 node, it's called DE, DE for Germany, nics DENICs. And there  
8 were several folks watching the, the traffic and the volume of  
9 traffic that night, and they noticed a significant spike in  
10 traffic that night just due to you know, the volume of  
11 information going through. And one of the reasons that they  
12 said that the the traffic was going up was due to the US  
13 elections.

14 MIKE LINDELL: In your opinion, this is an attack by  
15 other countries, of foreign, of foreign countries is what  
16 you're saying then.

17 COLONEL PHIL WALDRON: I believe from what I've seen  
18 in the, the witnesses that I've talked to, that this is a coup  
19 that, it definitely involved elements inside our own country  
20 and inside our own federal government. Definitely, definitely  
21 part of a coup that was aided and abetted by a foreign threat,  
22 nation-state a peer, enemy nation-state - -

23 MIKE LINDELL: - - Right.

24 COLONEL PHIL WALDRON: China.

1           MIKE LINDELL: Do you believe that this attack from  
2 other countries could not have happened without people here,  
3 domestic people, domestic traitors, basically?

4           COLONEL PHIL WALDRON: Yeah, I believe that. Again,  
5 we have affidavits of CIA and State Department personnel out  
6 of the Italian embassy participating in this coup. We have a  
7 name, email and phone number of a senior DOJ official from a,  
8 from a US attorney that said that this individual was shutting  
9 down any DOJ or FBI investigation into any election, any  
10 election related investigation, and they're trying to shut  
11 down judicial cases, court cases. So from inside our own DOJ,  
12 people were shutting down active investigations. You wonder  
13 why, you know, Mr. Barr didn't find or see any evidence of  
14 widespread election fraud, it's because the FBI never did  
15 anything other than to impede investigations into election  
16 fraud. The FBI went to question the truck drivers who deliver  
17 ballots and created affidavits. They were harassing, you know,  
18 the the Americans, you know, the patriotic Americans who were,  
19 who were whistleblowers and prosecuting them. Mike, you  
20 mentioned something earlier is the machines, the ES&S and  
21 Dominion machines. If you look at, you know, military planning  
22 factors, there are critical capabilities. A capability is what  
23 you have to have to execute your mission, or the enemy has to  
24 have to execute its mission successfully. So a critical

1 capability for any of this to happen are the inherent  
2 vulnerabilities that were built into ES&S and Dominion  
3 software, which is, you know, again, we've proven through,  
4 through our work that this is all related directly back to the  
5 soft, Smartmatic, Smartmatic, SGO Smartmatic software core.  
6 And they definitely had financial gains to, financial reasons,  
7 based on some of the other investments that they've made.  
8 Especially they, you know, looking down the road, if they make  
9 billions and billions of dollars, the board of SGO Smartmatic,  
10 because they own a, an air purification company. So just think  
11 about it, if you get to pick an administration that is  
12 favorable to your company, say if they past the Green New  
13 Deal, and you're going to make billions and billions of  
14 dollars off of government-mandated air purification systems  
15 and public buildings and apartment buildings and industrial  
16 complexes, you know, you would spend quite a bit of money on  
17 the frontside to make sure the election was done. The same  
18 thing with China, if China could avoid the US coming to  
19 Taiwan's defense, and we've seen indications of that already.  
20 And if China could avoid having to fight a campaign to protect  
21 their manmade islands to extend their territorial waters into  
22 international navigable waterways, if they could invest a  
23 billion dollars to do that versus fighting a war. Well,  
24 they've made a pretty good investment, and all the money that

1 they've made into the Biden family, all the money that they've  
2 made, invested into US universities and US businesses, buying  
3 up our medical and our technical intellectual property,  
4 stealing a lot more than they bought. They are, they are  
5 fighting a war, people just don't realize that we're under  
6 attack.

7 STEVE BANNON: Look, Colonel Waldron is a cyber  
8 warfare expert. Many people know him from, he's testified all  
9 over the country in these testimonies that Rudy Giuliani went  
10 with. I think he had a particularly big role in Phoenix,  
11 Arizona, where I think his first time he kind of came on the  
12 stage, but he was very impressive. He's a cyber warfare  
13 expert, but I've got to ask you. I've got to ask you, Mike.  
14 You've got Chris Krebs, who ran the infrastructure, election  
15 infrastructure piece for DHS, they reported up to Chad Wolf.  
16 Both these guys Chris Krebs and Chad Wolf, I think were, were  
17 Trump appointees, appointed by President Trump, selected by  
18 President Trump. Krebs said, Mike, that this was the safest  
19 election in US history. And he also I think, quoted in a  
20 statement he put out that not one vote was changed, there was  
21 no problem with any voting systems, there was no votes that  
22 went around and got changed, flipped or otherwise. And that's  
23 a quote from the, a virtual quote from this statement they put  
24 out by Chris Krebs, who's in charge of it, reported to Chad

1 Wolf, Chad Wolf never counted that, and I believe told the  
2 president and told the public consistently that nothing  
3 happened here. So I know you've got, you've got experts.  
4 They've made a lot of assertions. I'm sure people are looking  
5 for maybe some backup evidence and put some other stuff online  
6 to back up what, what Colonel Waldron said. But how do you  
7 respond to Chris Krebs? And he's the guy in charge for the US  
8 government. He said, hey, look, safest election in American  
9 history. Most secure, no cyber attacks, no problems. What do  
10 you say Mike Lindell?

11 MIKE LINDELL: He's either lying or he's naive. One  
12 of the two. It's only one of the two. People asked me earlier  
13 today they said, well, Mike, you got a person over here that  
14 says this and you say this, and someone says, you say this  
15 over here. There's only one truth, is you know, you can all  
16 have an argument but there's only one truth. What you're gonna  
17 see in some of this, some of this evidence in his, you know,  
18 in his defense, just came out, you know I only recently heard  
19 about on January 9th. So, but all this other stuff, if he's  
20 talking about all the, the charts I showed earlier, I mean  
21 give me a break, those numbers came from the Secretaries of  
22 State's office.

23 STEVE BANNON: Mike he made, Mike he made that  
24 statement on November 12th, so this would have come after the

1 activity that, that Colonel Waldron alleges so you know, this  
2 encompasses the evening of November 3rd and all the other  
3 ballots, etc. So it came out, I think was November 12th, so it  
4 was at least a week afterwards, where Krebs set up, and I  
5 think Krebs quit, I mean, he's adamant, he's gone on 60  
6 Minutes, he's gone everywhere. He's adamant, Wolf has been  
7 adamant, nothing went on here, safest in U.S. history. Another  
8 thing I just want to bring up before we go to the next  
9 segment, Colonel Waldron talked about bandwidth and all this  
10 bandwidth that's moving back and forth and they can monitor, I  
11 just want to bring up, and we'll get to this later, the  
12 Dominion CEO, I think in sworn testimony, actually said that,  
13 and he put out a statement afterwards that they don't have any  
14 servers anywhere outside the country. They don't send ballots,  
15 or these, or the electronic facsimiles of ballots that you  
16 talked about, they don't send them anywhere, these things  
17 don't transfer around, they absolutely do not move. And so all  
18 this bandwidth discussion about going overseas, the Dominion,  
19 we'll get into later, he says it just doesn't happen, because  
20 that's not the way the system works. So you got both the  
21 Department of Homeland Security, who's in charge of, they're  
22 Trump guys, and you've got the CEO, Poulos, from Dominion  
23 says, hey, it can't be a bandwidth thing that Waldron and  
24 these guys are tracking, so it doesn't happen. What would you

1 tell the audience and then how are you going to back up these  
2 assertions by Colonel Waldron, the cyber warfare expert?

3 MIKE LINDELL: Well, I'll tell you, if you're caught  
4 cheating at a poker game, what do you do? Of course, you start  
5 lying. And they're all liars there. They're lying, they're  
6 bold-faced lying. I mean, the easier part about it not going  
7 online if you're Dominion or Smartmatic, I mean, that's been  
8 proven 10 times over. So if you lie a little bit, usually  
9 you're lying a lot. And this is all going to come out. When  
10 you asked me about that other guy, we, you know, that remains  
11 to be seen. Is he, does he really, is he really that naive  
12 that he doesn't know what happened? Or is he lying? And then  
13 you know, what, what do you lie for? You usually lie to cover  
14 something up. You know, I have went out here with everything I  
15 have, because I'm 100%, 100% that we have all the proof,  
16 that's why it's called Absolute Proof. 100%. And we will show  
17 - -

18 STEVE BANNON: Mike, we're, we got to go to the next  
19 segment, because I want to get through, through this within  
20 the three hour timeframe. But you're committed to put  
21 additional information online to back up some of these  
22 assertions as you get closer to some of these court cases,  
23 particularly the Supreme Court?

24 MIKE LINDELL: Well, you know, this is the whole

1 thing we're here tonight for, we need the Supreme Court to  
2 accept what you're going to see here tonight, because there's  
3 all kinds of, what you're gonna see here tonight, multiply  
4 that by 100, is what we, is what we have, is what's out there.  
5 Everybody came to me, you've got to realize, they go, how did  
6 you get that, Mike? Everybody came to me because nobody could  
7 get the word out. You couldn't get it out. You just got  
8 squished, you know, someone raise their hand they go, hey, I  
9 seen this machine and it does this and I looked at it, we did  
10 this. You know, I said, hey, I seen this. So you know, they  
11 had to come to me, because they knew I wasn't going to back  
12 down and I have the platform, even my platform, that's why  
13 they're trying to smash it. But they're having a hard time.

14 STEVE BANNON: Yeah. Let's, I tell you what, we got  
15 Russ Ramsland now from the Allied Security Operations Group.  
16 Let's, let's hear the segment here. Mike Lindell and I will  
17 join you right after this segment.

18 MIKE LINDELL (IN VIDEO CLIP): So now we have with us  
19 Russel Ramsland. He's a founding member of Allied Security  
20 Operational Group. They're based in Dallas, Texas, and they do  
21 cyber forensics and security. Russell, how are you, how were  
22 you involved with all this election fraud?

23 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, it was  
24 interesting, Mike. It's been a long road for us, about two

1 years ago we had some logs from the Dallas general election  
2 brought to us from the central tabulation server. And people  
3 ask, what do these logs mean? It was about 1,100 pages, and we  
4 got looking at them and we were horrified at what we found.  
5 Because what we found was that people were getting into the  
6 system, and they were changing the votes. They were erasing  
7 databases, they were reloading them. And it was coming from  
8 remote locations and our guys are going this can't be.

9 MIKE LINDELL (IN VIDEO CLIP): Now this was back,  
10 this is in 2018 when they, so these guys came to you with  
11 these, and these were, these were voting machines, and were  
12 they Dominion machines?

13 RUSSELL RAMSLAND (IN VIDEO CLIP): No, no, no, we use  
14 ES&S in Dallas, not Dominion.

15 MIKE LINDELL (IN VIDEO CLIP): So are they, are they,  
16 are they similar, similar machines?

17 RUSSELL RAMSLAND (IN VIDEO CLIP): Yes, yeah, it's,  
18 it's very similar stuff. Most of these voting companies all  
19 have similar DNA in their [inaudible].

20 MIKE LINDELL (IN VIDEO CLIP): But what you've seen  
21 was, was very, it horrified you?

22 RUSSELL RAMSLAND (IN VIDEO CLIP): Yeah, it did.  
23 Because clearly somebody was playing with the election.

24 MIKE LINDELL (IN VIDEO CLIP): Wow.

1           RUSSELL RAMSLAND (IN VIDEO CLIP): So we tried to get  
2 the authorities alerted. We brought in a DOJ prosecutor that  
3 ran the cyber group in North Texas. And she was horrified at  
4 what we showed her. And she asked us to put it together and  
5 eventually submitted it to the FBI. And we did that and they  
6 did nothing. So we continued to investigate and the more we  
7 found, the more horrifying it got. Now, this all was still  
8 coming out of Dallas. We tried to get senators to look at  
9 this, and we tried to get state officials to look at this, but  
10 we continued to work on it on our own, we had no client at  
11 all. And eventually, we did get seven members of the Freedom  
12 Caucus this last July to take a two hour briefing without  
13 staff. And what they saw was absolute proof that this  
14 electronic voting system that we have is completely  
15 compromised. It can be completely manipulated. And they were  
16 horrified.

17           MIKE LINDELL (IN VIDEO CLIP): We've all heard that  
18 Texas denied these machines.

19           RUSSELL RAMSLAND (IN VIDEO CLIP): Well, Texas denied  
20 Dominion, but Texas uses other voting machines. We use Hart,  
21 and we use ES&S in Texas.

22           MIKE LINDELL (IN VIDEO CLIP): Right. So why, so why  
23 would Texas, they denied these Dominion ones, and in your  
24 opinion, so they must have looked at them and said there's

1 something there we don't like, but then they, over here, with  
2 Smartmatic and these other ones, they were okay with that?  
3 What would be your opinion of why, why one, they would deny  
4 one machine that, because they're afraid of election fraud,  
5 and, and over here, they accepted that one?

6 RUSSELL RAMSLAND (IN VIDEO CLIP): I think that it  
7 sometimes has more to do with politics and influence, who gets  
8 through and who doesn't not necessarily for the machines.

9 MIKE LINDELL (IN VIDEO CLIP): Okay.

10 RUSSELL RAMSLAND (IN VIDEO CLIP): So we finally  
11 ended up with some investigators, with Ron Johnson's  
12 Department of Homeland Security oversight group. And they were  
13 horrified at what we showed them. And they tried to get CISA,  
14 which is the Cyber Intelligence Security Administration inside  
15 the DHS, they tried to get CISA to take a look. CISA would not  
16 take the briefing, they couldn't be less interested. So we  
17 didn't quite know what to do. We were beginning to find some  
18 media people who wanted to start talking about this, and they  
19 became appalled. But the break really came in early August  
20 when we got some DHS people in Austin with the I&A division,  
21 the intelligence and analysis division down there, to take a  
22 look at what we had. And that's the division that used to have  
23 voter integrity before it was handed to CISA. So they looked  
24 at it and they were horrified and they sent a whole team to

1 our shop, we spent 11 hours with them. They asked us if we  
2 would give them their, our data, we said of course. And so we  
3 gave them all our data. They took it back to Austin and  
4 unknown to us, they gave it to three private cyber groups that  
5 they use, and said, hey, are these guys crazy? I mean, is this  
6 nuts or is this, is there something here? Well, all three  
7 groups looked at it and all three groups came back, not only  
8 is it right, it's horrifying.

9 MIKE LINDELL (IN VIDEO CLIP): Okay, I want to ask  
10 you there when you say horrify, can you explain to everybody  
11 watching this right now, what, what horrified you, was that  
12 the fact they could go online?

13 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, there's no  
14 effective security at all for your votes. Your votes are  
15 stored overseas, where they can be easily - -

16 MIKE LINDELL (IN VIDEO CLIP): - - They're stored  
17 overseas?

18 RUSSELL RAMSLAND (IN VIDEO CLIP): Yes, yeah. Yeah.

19 MIKE LINDELL (IN VIDEO CLIP): Wow.

20 RUSSELL RAMSLAND (IN VIDEO CLIP): 27 states use  
21 what's called Clarity Scytl Election Night Reporting and those  
22 servers are overseas, they have what are called s3 bucket  
23 vulnerabilities. And people can get in and change the votes  
24 there. And then they can load them all the way back down to

1 the county level here in this country because Scytl gets all  
2 their credentials from every single county server here. And so  
3 they can get into every single county server and change the  
4 votes here from overseas. It's crazy.

5 MIKE LINDELL (IN VIDEO CLIP): Wow. So everything  
6 that everybody has been talking about all through, that  
7 they've tried to suppress and that they, we heard that  
8 machines weren't even online, and you're saying that 27 states  
9 use this and the servers are overseas. So these can go over  
10 there and they can change the vote to anything they want and  
11 send it back cyberly, by cyber.

12 RUSSELL RAMSLAND (IN VIDEO CLIP): Correct.

13 MIKE LINDELL (IN VIDEO CLIP): Wow.

14 RUSSELL RAMSLAND (IN VIDEO CLIP): So they became,  
15 the DHS people in Austin realize what we're telling them was  
16 correct, they became horrified. And they began to try to have  
17 a series of classified briefings within their own group in  
18 order to push this up, up the chain. And they got about one or  
19 two levels up, and then they met a solid wall of resistance  
20 that basically said, leave it alone, don't pursue it.

21 MIKE LINDELL (IN VIDEO CLIP): Wow. And what do you,  
22 what do you think being now, we're telling the facts on the  
23 show here. But in your mind, why would they do that? What,  
24 this is just subjectively, why would they, why would you, why

1 would they do that in your mind?

2 RUSSELL RAMSLAND (IN VIDEO CLIP): I don't know,  
3 Mike.

4 MIKE LINDELL (IN VIDEO CLIP): You can't explain it.  
5 I mean, this is, okay. So, so then, so take us from there. So  
6 this is like, what, what, approximately, when was this  
7 happening when it kind of, when it got stopped?

8 RUSSELL RAMSLAND (IN VIDEO CLIP): That was  
9 September.

10 MIKE LINDELL (IN VIDEO CLIP): Wow. Close to the  
11 election. Okay.

12 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, it's the  
13 election. So what actually happened in this election, this  
14 stolen election, we already knew was going to happen. We  
15 already had seen it. We knew it was all possible. We knew it  
16 was all out there. Now, we didn't know how many foreign  
17 servers. You know, before, we weren't seen very many foreign  
18 servers come in and change votes. But in this election, of  
19 course, we saw thousands from all over the world.

20 MIKE LINDELL (IN VIDEO CLIP): And you're seeing,  
21 you've seen thousands. Alright, you've seen all these these  
22 hacks, have you actually seen that with your own eyes?

23 RUSSELL RAMSLAND (IN VIDEO CLIP): We have seen the  
24 data that is I supposedly representative of that.

1           MIKE LINDELL (IN VIDEO CLIP): So this, the election  
2 goes down, you knew what was going to happen? Is it exactly  
3 what you thought was going to happen?

4           RUSSELL RAMSLAND (IN VIDEO CLIP): Yeah, we thought  
5 it was going to happen on three levels, we thought there would  
6 be massive local cheating, we thought there would be cheating  
7 through the actual voting companies themselves, whether it's  
8 them or someone else manipulating them and we thought that  
9 there would be cheating from votes being injected from  
10 overseas. And that's exactly what we saw happen. And we  
11 developed huge tons of absolute proof on this, but no court  
12 case was ever allowed, ever allowed it to be presented. So  
13 that sort of gave fodder to this media myth that it didn't  
14 exist, but it does exist. It's out there. It's unbelievable.  
15 It's massive.

16           MIKE LINDELL (IN VIDEO CLIP): Wow. Did everybody  
17 hear that? What he, what Russell's saying here? This is what  
18 everyone says. Well, there was no evidence. So you're saying  
19 no judges would look at the evidence, is that correct?

20           RUSSELL RAMSLAND (IN VIDEO CLIP): That's correct.

21           MIKE LINDELL (IN VIDEO CLIP): Okay. And now we don't  
22 know why. We don't know why. I mean, it wasn't because there  
23 wasn't evidence. They didn't even want to look at it. Is that  
24 correct?

1 RUSSELL RAMSLAND (IN VIDEO CLIP): That is correct.

2 MIKE LINDELL (IN VIDEO CLIP): Okay, now we've heard  
3 about, we've all heard, in fact on this show, the Antrim  
4 County in Michigan. Were you guys ever, were you guys, I,  
5 weren't you guys contacted to look into that?

6 RUSSELL RAMSLAND (IN VIDEO CLIP): That was our work,  
7 yes.

8 MIKE LINDELL (IN VIDEO CLIP): Oh wow. Okay.

9 RUSSELL RAMSLAND (IN VIDEO CLIP): I actually signed  
10 the forensic audit report. And cuz our guys did all that, our,  
11 part of our team. And that came about because there was a down  
12 ballot race. And the judge allowed some limited discovery.  
13 What came out of that was appalling enough that he allowed  
14 further discovery. And then of course, that report went  
15 national, because what we found was so horrifying.

16 MIKE LINDELL (IN VIDEO CLIP): Right, for everybody  
17 out there, what we've all heard, this Antrim County, in  
18 Michigan, and in this show here, we've, you know, you've,  
19 you've seen it, we've had, we've, this is a, this is the  
20 reason it was talked about so much, because this is a small  
21 county, and it was like 15,000-some people voted and it was  
22 7,000-some votes flipped. I mean, so it was so obvious. You  
23 know, we had 65% Republican and 35% Democrat normally, and it  
24 was completely flipped. So everybody in town knew it was a

1 deviation that didn't make sense. And so, so Russell, this  
2 case is still open is that, that's correct, right?

3 RUSSELL RAMSLAND (IN VIDEO CLIP): That is, that is  
4 correct.

5 MIKE LINDELL (IN VIDEO CLIP): Okay, can I, can I ask  
6 you this? So what you've seen there is exactly what you knew  
7 was going to happen. And now were you able to look at other  
8 places? What was different about Antrim County now that, what  
9 we all heard was you were able to get into the, you know, the  
10 forensics of it and see all this. Were you able, have you been  
11 able to do that in any other places in the United States since  
12 then, or, you know, since this election ended on, in November?

13 RUSSELL RAMSLAND (IN VIDEO CLIP): Actually, on a  
14 limited basis, we have been able to go in two other counties.  
15 We have not published that information yet. And there are  
16 reasons why we aren't publishing that information right now.  
17 But both of them have not only confirmed, they have confirmed  
18 that it's even worse than in Antrim.

19 MIKE LINDELL (IN VIDEO CLIP): Did everybody hear  
20 that? What we have here, and Russell can't disclose this  
21 because what, every time something pops up, it gets buried out  
22 there, things happen. I don't, I, you know, this is, this is  
23 the most attack on our country, and I'm telling you, ever. I  
24 mean, this is, and, if that's right, you know, it's getting

1 suppressed every, everywhere. So what he's saying, two other  
2 places now, is this breaking news right now? You're saying  
3 right now, you have two other places, and what you're seeing  
4 is even worse than you could ever imagine?

5 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, it's, it's,  
6 it's just like Antrim only it's worse in many ways. You know,  
7 in Antrim, what people need to understand, real simple, Mike,  
8 when people vote and they scan their ballot in, it either goes  
9 into the regular sort of bucket and gets voted, or else it  
10 goes into what's called an adjudication bucket. If it goes  
11 into the adjudication bucket, then whoever's running the  
12 voting system gets to vote that vote however they want. Well,  
13 in, in Antrim we found ballot rejection rates of 82%, 82%. 82%  
14 of the ballots were going to adjudication - -

15 MIKE LINDELL (IN VIDEO CLIP): What is, what is this,  
16 what's the normal number? I mean, is there a normal number for  
17 a, for an election that would be, what percentage, and, and  
18 what would be it on the high end?

19 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, certainly  
20 less than 1% would be, should ever go to adjudication - -

21 MIKE LINDELL (IN VIDEO CLIP): - - Less than 1%,  
22 everybody, and this was 85%.

23 RUSSELL RAMSLAND (IN VIDEO CLIP): Yeah and Fulton  
24 County, they, the Fulton County people themselves admitted to

1 a 93.6% adjudication rate in some cases, that means the entire  
2 election was decided by the people that ran the system, not by  
3 the voters.

4 MIKE LINDELL (IN VIDEO CLIP): And now what you're  
5 talking about there is it, this is one of the way these  
6 machines, can, you can, that you can cheat through the fraud,  
7 or cheat there. But this does not count what you're talking  
8 about earlier, the cyber forensics, where that goes overseas  
9 to these servers that are all based over there, correct?

10 RUSSELL RAMSLAND (IN VIDEO CLIP): That does not,  
11 that's a different issue altogether.

12 MIKE LINDELL (IN VIDEO CLIP): Right, so both of them  
13 involved the machines, everybody. One we've talked about in  
14 this show is here. But then the cyber one is what you just  
15 heard from Russell, which he said earlier, this is all the  
16 attack by the other countries that hacked in which we're going  
17 to show you that proof now that Russell doesn't even know that  
18 we have that's going to show who did it, the time they did it,  
19 the computer they did it off it, everything.

20 STEVE BANNON: Okay, Mike, here's what I don't  
21 understand. The State of Texas prides itself right now on  
22 running the best election overall, I guess with Florida. Okay.  
23 They had the report that we've referred to and you have that  
24 says they didn't pick Dominion Systems. They go through all

1 the problems with Dominion. I think they picked ES&S. And I  
2 don't know, and I've talked to a lot of officials down in  
3 Texas, of how proud they are, how they ran the elections. This  
4 is the first time I'm hearing that there's some big voter  
5 fraud problem in Dallas as Ramsland is saying. So how do you  
6 square that or what other information can Russell Ramsland put  
7 forward to actually show that these ESS machines are bad, and  
8 you've got a problem in Dallas and maybe some other places  
9 too?

10 MIKE LINDELL: Well, you'll see that later in the  
11 show. But right, but the point of that, of bringing up the  
12 Texas thing is ESS, Smartmatic, and Dominion, you can  
13 interchange the names, they all are the same. The cyber  
14 phonetics we show it goes through all these machine, they're  
15 all the same. This is why whole point, you can never use any  
16 machine for any election ever. And that's, that's, and I'm not  
17 stopping till that happens. We have to, we lose everything.  
18 And so you're going to find out, and it will come out, I'll  
19 show you. I will put, you know the stuff I end up putting up  
20 on the website will show you how I did. It didn't just happen  
21 in these swing states, you got to realize, it was every state.

22 STEVE BANNON: Fine, let's go, let's, I want to  
23 continue playing this, but I just want to re-emphasize, you're  
24 saying you're not picking on any one company, you're picking

1 on the whole industry. You want all the machines to go, and go  
2 back to a system that somehow we can do this manually. I just  
3 want to make sure that you're saying, I don't care if it's ESS  
4 or even other companies you haven't heard of, I, my focus is  
5 to get rid of these machines and get back to some sense of  
6 where you get human involvement in here and human involvement  
7 in counting these and that'll take any questions away about  
8 whether cyber attacks or they're changing votes by cyber.  
9 Let's go to the second part of Russ Ramsland's interview with  
10 Mike Lindell in Absolute Proof.

TRANSCRIBER'S CERTIFICATE

I hereby certify that the foregoing pages  
are a true, accurate, and complete transcript of the  
proceedings transcribed from a copy of the electronic  
sound recording to the best of our knowledge and ability.

IN WITNESS WHEREOF, I have hereunto set my hand on  
this 25th day of October, 2021.

TRANSCRIPT OF THE AUDIO RECORDING OF:

One America News Network

February 11, 2021

Vol. 2

TRANSCRIBED BY: THOMPSON COURT REPORTERS INC.

1           MIKE LINDELL (IN VIDEO CLIP): If we would have never  
2 found out, or this would never have gotten, what we're going  
3 to get to now. What in, what would the future have looked like  
4 in elections?

5           RUSSELL RAMSLAND (IN VIDEO CLIP): Well, I mean,  
6 we're basically approaching Venezuela, where it doesn't matter  
7 who's voted.

8           MIKE LINDELL (IN VIDEO CLIP): Doesn't matter. Right.  
9 Somebody else picks our people for him so why vote, right? I  
10 mean, that's the way, that's the way it would have been.  
11 Machines that go online, like, and it's not, now you said  
12 earlier, it's not just Dominion, it's all the, all the  
13 machines that were used in this election. What, is that what  
14 you would say?

15           RUSSELL RAMSLAND (IN VIDEO CLIP): Yes, that's  
16 absolutely a fair statement. And look, let me, let me tell you  
17 a little bit about that. You know, for these people that say  
18 it's not online, we have videos of workers with pollbooks, who  
19 are swiping left on their pollbook and bringing up Netflix and  
20 getting a movie and watching it on their pollbook. How does  
21 that happen if it's not connected to the internet?

22           MIKE LINDELL (IN VIDEO CLIP): Right, right.

23           RUSSELL RAMSLAND (IN VIDEO CLIP): We have affidavits  
24 of a election judge who showed up at her precinct, found to

1 her horror, they had loaded the wrong precinct in her  
2 equipment, called her voting company and her voting company  
3 put her on hold and the self, the help desk from another state  
4 called in and in 10 minutes somehow reloaded her pollbooks  
5 from another state with the correct precinct. How does that  
6 happen if it's not connected to the internet?

7 MIKE LINDELL (IN VIDEO CLIP): I know they were all  
8 online, but they, but is it illegal for them to be online?

9 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, it depends,  
10 some places yes, some places no. I mean, the assurance is that  
11 you can trust the voting system because they're not online,  
12 but they are most clearly online.

13 MIKE LINDELL (IN VIDEO CLIP): I gotcha. I gotcha.

14 RUSSELL RAMSLAND (IN VIDEO CLIP): Now here's one you  
15 don't know. We ran this, a different group here, a little  
16 operation in Dallas during this last election. And let me  
17 describe the operation, so you'll understand the magnitude of what  
18 I'm telling you. What we did is every day, we just took the  
19 information on the voter records of the people who voted that day  
20 in Dallas, Dallas posts them online. So you get a big, big long  
21 record of this voter, you don't see how he voted but you see  
22 everything else, name, where he lives, when he asked for a ballot,  
23 where he voted, his residence address, on and on and on. And all  
24 of those, as you know, are comprised of zeros and ones. That's

1 how computers work. So all we did is we would add up all the  
2 zeros and ones in that voter record, and store it. And then we  
3 would watch what would happen to that voter record as we  
4 worked our way through early voting. Mike, we saw 57,000 votes  
5 get their voter records changed during early election alone in  
6 Dallas, Texas.

7 MIKE LINDELL (IN VIDEO CLIP): Wow.

8 RUSSELL RAMSLAND (IN VIDEO CLIP): We saw a 10 block  
9 long street in Dallas, Texas, get every single vote wiped out,  
10 and then subsequently replaced one at a time with clearly  
11 something changed because the the hash, in other words, it's,  
12 it's a, a record of the zeros and ones, had been changed. And  
13 so we know it was tampered with.

14 MIKE LINDELL (IN VIDEO CLIP): Wow.

15 RUSSELL RAMSLAND (IN VIDEO CLIP): I mean it's  
16 unbelievable.

17 MIKE LINDELL (IN VIDEO CLIP): Was it nationwide that  
18 this happened?

19 RUSSELL RAMSLAND (IN VIDEO CLIP): Yes.

20 MIKE LINDELL (IN VIDEO CLIP): Okay. And you've seen  
21 the cyber, the cyber forensics that show that, we will show  
22 that too. But I just want to ask you, why, if you're, if  
23 there's, you know, why did they, why did they set these  
24 machines down to win Texas too? I mean, or do you, you know,

1 what would be your opinion on that, of why they didn't set  
2 them high enough to win Texas too?

3 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, there had  
4 been a certain amount of concern raised in, in Texas as a  
5 result of our 2018 work. You know, Pete Sessions actually  
6 filed a complaint in Texas, and published a paper on it,  
7 because his race got stolen. And so they were very well aware  
8 that Texas was going to come under some scrutiny that other  
9 places probably were not. And there was also a huge operation  
10 down in Houston, where a vote scamming scheme for over 700,000  
11 votes was exposed. And so there was a lot going on in Texas,  
12 and I think it made him a little skittish to operate as  
13 brazenly here as they - -

14 MIKE LINDELL (IN VIDEO CLIP): They might, they might  
15 have backed off a little. But you just said something there.  
16 So you're telling me that they controlled all the downtickets  
17 too if they decided that they wanted to flip a senator or a  
18 congressman or whatever, is that correct?

19 RUSSELL RAMSLAND (IN VIDEO CLIP): No doubt.  
20 Absolutely.

21 MIKE LINDELL (IN VIDEO CLIP): So Russell, could you  
22 speak specifically to the malware?

23 RUSSELL RAMSLAND (IN VIDEO CLIP): Sure. There is a  
24 company out of Barcelona, Spain call Scytl and it owns a

1 company called Clarity Election Night Reporting. And Hart  
2 reports to them and Dominion reports to them, ES&S reports to  
3 them, all these companies report the votes to them. And then  
4 election night reporting supposedly just passes the votes  
5 along to the media. But using standard white hat tools, we can  
6 look and see what is on their server over in Frankfurt,  
7 Germany. And there is a, an area on their server on a  
8 particular kind of equipment, there is a piece of malware  
9 called QSnatch. QSnatch actually watches all the information  
10 that comes in, and it grabs the login credentials of every  
11 single county in the country that reports to it so that once  
12 it has all those credentials, it can then look back into that  
13 county and it can access the county database from overseas or  
14 wherever else it wants to, if you want to inject changed  
15 votes, either to the adjudication system or just plain flat  
16 replace the database. So it's, it's, a, it's a massive,  
17 massive, massive security vulnerability. And it is there, it  
18 is working and they have all the login ability they need to  
19 get into any county that reports to them.

20 MIKE LINDELL (IN VIDEO CLIP): Wow so, so basically,  
21 what you said earlier, all the, all the servers are over  
22 there, they can take all of our counties in our country, look  
23 at them, and then decide what they want to do with that  
24 information and what they can do in the county, what they need

1 to flip. So, you know, we all heard this, we all heard about  
2 this Italy thing and that it went to Italy and Germany where  
3 they had to on the, I guess this would be in the middle of the  
4 night on November 4th. Is this something, I, would you know  
5 anything about that? I mean, to, I mean, so the, what we've  
6 all heard out there is it went over there, some guy even  
7 admitted he did it, which we're going to have his affidavits  
8 up here, but what do you, what's your opinion on that?

9 RUSSELL RAMSLAND (IN VIDEO CLIP): Well, our opinion  
10 on that was that it should have been investigated. Because it  
11 is very consistent with what we do see happening. But it was  
12 not investigated. Apparently, the Department of Justice did  
13 not investigate. You know, you got the usual, "Oh, it's been  
14 debunked." Well, who debunked it? "Uhhh." When did they debunk  
15 it? How did they debunk it? "Uhhh." There was no investigation  
16 by anyone of that information. And there should have been  
17 because it is entirely consistent. I don't know if it's true.  
18 But it's entirely consistent with everything we have seen in  
19 terms of capabilities.

20 MIKE LINDELL (IN VIDEO CLIP): Bill Barr comes out  
21 and said, there's no evidence. I mean, what would be your  
22 opinion why people would keep pushing this down and not  
23 wanting to know, I don't care what side of political lines  
24 you're on. Why would you not want to know if it the truth?

1           RUSSELL RAMSLAND (IN VIDEO CLIP): That has been a  
2 constant, haunting question to everyone on our team. I think  
3 it's a combination of things. I think some people are truly,  
4 completely, totally corrupt. I suspect that at the bottom of  
5 this, you might find that our government has been changing  
6 votes in other countries for years, and they don't really want  
7 it revealed, certain parts of our government. I think that  
8 there are people that don't want to look, they're afraid to  
9 look. I think there are probably people who are compromised  
10 and they've been told to stay out of it. I think it's a  
11 variety. It's not one simple little reason.

12           MIKE LINDELL (IN VIDEO CLIP): Right and that's what  
13 I wanted people to hear, because I hear it all the time.  
14 People are going, you know what, this, you know, Bill Barr  
15 said this and the all, there's no, none of the judges accepted  
16 it, and you hear all this. And we can't explain all that,  
17 because it's probably multiple things like Russell says there  
18 and that's my opinion, too. It could be anywhere up to a dozen  
19 things, who knows. But it doesn't matter. All that doesn't  
20 matter because now the truth is told today and it's all coming  
21 out. And, and everybody you know, I really believe what's  
22 going to happen once everybody sees now this is finally you're  
23 going to have people that aren't afraid to speak out, because  
24 it'll be, it's too late to close the gate, the cows are out of

1 the barn. Everybody's gonna know about it, and they're gonna  
2 want to know more and more. So...

3 RUSSELL RAMSLAND (IN VIDEO CLIP): You know, Mike,  
4 the real thing is, I think pretty soon the question's gonna  
5 start to turn around and people are going to go, wait a  
6 minute, what is everyone so afraid of? Why are they going to  
7 such incredible lengths to say there's nothing here when there  
8 clearly is something here? Well you know, this is almost like,  
9 you and I remember Enron, this is almost like Enron. Would we  
10 all be saying, "Oh, no, we don't want to investigate Enron. No  
11 one should look into Enron. No, no, Enron shouldn't have to  
12 tell you how they spend your money. You just keep giving them  
13 your 401k money." No. That's not how it works. And that's not  
14 how our voting system should work either.

15 STEVE BANNON: Now look, Mike, I don't know what  
16 Venezuela or Venezuela has to do with the United States in  
17 the, in the 2020 presidential election. But I think for the  
18 audience, and for people that just want to get to the facts,  
19 are you prepared, Russ put some statements out there, made  
20 some assertions, are you prepared to bring eyewitnesses from  
21 Venezuela or people that can actually talk the specifics about  
22 this? And somehow you'll put it up online or augment this film  
23 somehow, so people can actually hear eyewitness testimony, are  
24 you prepared to do that?

1           MIKE LINDELL: Oh, absolutely. And I, my, as part of  
2 my due diligence, that's been all this week. I wanted to go  
3 back to where this all started. And Venezuela, it all started  
4 in Venezuela with Smartmatic, not Dominion or the other one,  
5 it was with Smartmatic. And I have, we're going to have the  
6 gal, all this out, I'll throw it all, that evidence I will put  
7 up on my MichaelJLindell.com website, you're gonna see all  
8 that stuff we're adding, but it was very interesting, her  
9 story, she got attacked and put down just like what's  
10 happening to me here, because she knew, she knew she had the  
11 evidence. She had the evidence you're gonna see tonight, she  
12 had it, and they just, but she didn't have this big platform.  
13 So you're gonna, yeah you're gonna see that and you'll see all  
14 that, anything you, you know to back up, when you talk about  
15 Russ Ramsland and his company, they are the best in the world  
16 at these machines, getting inside them and, and you know,  
17 getting the footprints and doing that, these guys are amazing.  
18 You know - -

19           STEVE BANNON: But I just want to make, I want to  
20 make sure we're clear, to particularly everybody on the left  
21 and all the media that's attacking you, you're prepared to  
22 have her on tape, you're prepared to put all this stuff about  
23 this whole situation in Venezuela, and with Russ Ramsland's  
24 company, Colonel Waldron, you're prepared to put up additional

1 information online so people can check more the hard evidence  
2 of this. This is a commitment you're making?

3 MIKE LINDELL: Right, and if it, yes, absolutely. And  
4 I want to say this, though, what Russ is saying, is what I'm  
5 telling you all. Look, in Venezuela, it happened in a very  
6 short period of time, where the socialists, were they got in  
7 there and their country was gone. And how did they do it? They  
8 did it through the use of these machines. When you can pick  
9 who you vote for, who go you know, this is what we're all  
10 talking about tonight, it's very important. What Russ is  
11 saying there, this, if we don't get rid of the machines, we  
12 will, they're coming in now, this election, this is what  
13 happened, this selection. So it's very serious stuff and yes.

14 STEVE BANNON: Let's go, we're going to, you're going  
15 to next meet one of the smartest guys in the country, Dr.  
16 Shiva from MIT, just an extraordinary individual. His  
17 interview with Mike Lindell in Absolute Proof is next.

18 MIKE LINDELL (IN VIDEO CLIP): So now we have with  
19 us, Dr. Shiva. He has four MIT degrees. He's an expert at  
20 system science and pattern analysis and I met him four weeks  
21 ago, because I don't want anyone out there going, "Well, Mike,  
22 why didn't you bring this to us before?" Well, I just met Dr.  
23 Shiva four weeks ago, and he's gonna tell you, he actually ran  
24 for Senate. And he knows all about these machines now and

1 we're going to hear some of the stuff that I found out went  
2 wow, this is a, absolutely validates this election fraud with  
3 these machines. So...

4 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Thanks, Mike.  
5 I'm glad we connected.

6 MIKE LINDELL (IN VIDEO CLIP): Yeah.

7 DR. SHIVA AYYADURAI (IN VIDEO CLIP): You know, it's  
8 an interesting opportunity for me, Mike, because it's rare  
9 that a guy who's a scientist, an engineer, an MIT guy even  
10 runs for office.

11 MIKE LINDELL (IN VIDEO CLIP): Right.

12 DR. SHIVA AYYADURAI (IN VIDEO CLIP): And then it's  
13 even more rare that you come across something you never thinks  
14 occurs in the United States. You know, I grew up in India and  
15 third world countries. We talk about election fraud. When I  
16 was running in Massachusetts in 2020 we had 3,000 volunteers  
17 on the ground, you know, 20,000 bumper stickers, 10,000 lawn  
18 signs, billboard ads, radio, TV, network, we were everywhere.  
19 The GOP establishment, who doesn't want a bottoms-up guy like  
20 me, who hated Trump, ran a no-name out there who, no real lawn  
21 signs, no bumper stickers, no organization, nothing. And we  
22 knew on election night, which was the Republican primary  
23 September 1st, 2020, the word landslide is what we heard  
24 everywhere. We knew we - -

1           MIKE LINDELL (IN VIDEO CLIP): But you were gonna win  
2 by a landslide.

3           DR. SHIVA AYYADURAI (IN VIDEO CLIP): Oh, yeah, yeah.  
4 I mean, it was obvious. I mean, we worked. I mean - -

5           MIKE LINDELL (IN VIDEO CLIP): I think you said  
6 unless there was election fraud, but you probably thought, but  
7 I just, you know, maybe someone put on two ballots.

8           DR. SHIVA AYYADURAI (IN VIDEO CLIP): Yeah, one of my  
9 close friends said, "Shiva, we're gonna win this unless  
10 there's election fraud." And I just thought this is just some  
11 fringe stuff, right?

12           MIKE LINDELL (IN VIDEO CLIP): Right but you weren't  
13 thinking about machines?

14           DR. SHIVA AYYADURAI (IN VIDEO CLIP): I wasn't  
15 thinking about machines, because I didn't know that, you know,  
16 you know, from creating email and all these systems, I know  
17 the power of machines - -

18           MIKE LINDELL (IN VIDEO CLIP): Oh, by the way, yeah,  
19 he created emails, right?

20           DR. SHIVA AYYADURAI (IN VIDEO CLIP): I did, I  
21 created email as a - -

22           MIKE LINDELL (IN VIDEO CLIP): Creator of email. I  
23 just want to tell you, the guy's a genius. So what you're  
24 going to hear here, this is what I did my due diligence on. I,

1 you know, this is just one guy going okay. You know, is this  
2 real or is this not? And it, believe me, it's real.

3 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Yeah, I mean,  
4 you know, so I have a lot of history, not only pattern  
5 analysis and systems science but I build large-scale computer  
6 systems and stuff I've used has been used by the Senate, has  
7 been used by the largest fortune 1000 companies in the world.  
8 So I know how you move from paper-based systems and electronic  
9 systems. And I know the power of electronic systems. When you  
10 put some process that's in electronic form, a single  
11 individual has immense amounts of power. So that's the  
12 background. But on September 1st, 2020, what we saw was, we  
13 knew we'd won on a landslide. And there we are, with our big  
14 party set up, and we see the results coming in. Now  
15 Massachusetts, we saw in Franklin County, which is 80 to 90%,  
16 hand-counted paper ballots, no machines, I win by 10%. And in  
17 every other County, Mike, 60/40, 60/40, 60/40 - -

18 MIKE LINDELL (IN VIDEO CLIP): That you lost by?

19 DR. SHIVA AYYADURAI (IN VIDEO CLIP): I lost by.

20 MIKE LINDELL (IN VIDEO CLIP): The exact percentage.

21 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Exact  
22 percentage, by a guy who was, in a black county this guy wins,  
23 in a white county wins, and in a Hispanic county the guy was  
24 nowhere - -

1 MIKE LINDELL (IN VIDEO CLIP): By the same  
2 percentage.

3 DR. SHIVA AYYADURAI (IN VIDEO CLIP): By the same  
4 percentages.

5 MIKE LINDELL (IN VIDEO CLIP): That's not only a  
6 deviation, but it's an anomaly.

7 DR. SHIVA AYYADURAI (IN VIDEO CLIP): It's an  
8 anomaly.

9 MIKE LINDELL (IN VIDEO CLIP): Do you think that's  
10 impossible, or you're like me - -

11 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Well, it's  
12 highly, I mean to be from a scientific standpoint, you would  
13 say it's highly unlikely. And that began my journey to start  
14 really saying, wow, election fraud could take place in  
15 America. So I started reading up everything I could, by  
16 September 9th, eight days later. I found out something  
17 interesting, I found out that these electronic voting  
18 machines, remember, there's two ways you can vote. One is you  
19 vote, you give a paper ballot, and the paper ballot is counted  
20 by human beings, two people, that's what occurred in Franklin  
21 County. But in those other counties, they take that paper  
22 ballot when you vote electronically - -

23 MIKE LINDELL (IN VIDEO CLIP): Into a machine.

24 DR. SHIVA AYYADURAI (IN VIDEO CLIP): It goes into a

1 machine. And what happens in that machine? The paper ballot is  
2 converted to an image called a ballot image, no different than  
3 you taking a phone, a picture with your iPhone. Now so what is  
4 actually counted? The paper ballot gets put aside, the  
5 machine, the electronic quote unquote AI on the machine,  
6 actually tries to figure out where the circles are. And the  
7 machine is counting the ballot image. So at that stamp, at  
8 that point I realized, oh my god, the ballot image is the  
9 ballot, the images are the ballot. So I - -

10 MIKE LINDELL (IN VIDEO CLIP): You were gonna get to  
11 the bottom of this no matter what.

12 DR. SHIVA AYYADURAI (IN VIDEO CLIP): No, I am,  
13 because I like to solve problems.

14 MIKE LINDELL (IN VIDEO CLIP): Because you're like  
15 me. I want to say something. One thing about Dr. Shiva, when I  
16 met him, I'm going wow, he's just like me. I look at  
17 deviations every day, if I see a TV station that normally does  
18 10,000, because I track them all individually, it does 10,000  
19 and all of a sudden, one day it did only 2,000. I'll tell you  
20 what, what I do is spend the rest of the day or a week or a  
21 month, I'm going to find out how that happened. Because the  
22 only way things change is what a different input.

23 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Exactly.

24 MIKE LINDELL (IN VIDEO CLIP): A different input. So

1 you've got this anomaly, you've got it, you've got this  
2 deviation. And not just because you are running, a person, you  
3 know, it's not like you were just biased going, you know, I  
4 won, I know I won. Now you're digging in to find out how  
5 these, how this weird mathematically - -

6 DR. SHIVA AYYADURAI (IN VIDEO CLIP): - - Exactly, I  
7 mean the scientist-engineer kicked in, right?

8 MIKE LINDELL (IN VIDEO CLIP): Right.

9 DR. SHIVA AYYADURAI (IN VIDEO CLIP): I mean, just  
10 like you're a scientist and engineer in a very, from a  
11 marketing standpoint. But I think we both sort of pursued the  
12 same aims. But here, what we found out was that the first  
13 thing that gave me a big insight is that A, ballot images are  
14 being created. And I also found out by federal law, in 1974,  
15 they passed a law for federal elections, those ballot images  
16 must be saved. So that was one piece of the puzzle. Okay? The  
17 other piece of the puzzle was, I found out that the voting  
18 machines, as early as 2002, have a feature in there called a  
19 weighted race feature, where it's embedded into the system  
20 where you can multiply candidates votes by a percentage. All  
21 right, so what that means is you get 1,000 votes, I get 1,000  
22 votes, I can multiply your votes by two, my votes by point  
23 five. And if everyone, anyone doesn't believe this, go look up  
24 the Diebold voting manual, go to page two dash 126 in the

1 manual in the 2002 version, and you'll see it in there.

2 MIKE LINDELL (IN VIDEO CLIP): So did, were you able  
3 to prove that yours, that your lecture was stole by the  
4 machines? Did you mathematically do you prove, did you prove  
5 100% that this could only be recreated by a machine to do  
6 that, 60/40, that's it?

7 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Yeah. So what  
8 we proved, Mike, was, first of all, we showed that the state  
9 had deleted the ballot images, which means that if they had  
10 the ballot image, they could have found the algorithm. So they  
11 came upon me to use all that 40, 50, or 40 years of experience  
12 that I'd learned from 14 all the way at MIT, I had to bring  
13 all that rocket science to actually look at the data. And what  
14 I found out in the data was a very interesting anomaly. Which  
15 in, as you said a deviation, in one of the counties called  
16 Suffolk County, which is typically highly Democrat. So we were  
17 able to see these interesting numbers up, down, up, down, up  
18 down. Essentially, imagine going to a casino, every time you  
19 roll twice the number of odd as you get even, okay, it's  
20 unlikely, should be 50/50. And in fact, when we did the  
21 numbers, that pattern could only occur one in 100,000. We  
22 apply, we, you know, sued the state on this. And the judge did  
23 not dismiss our case.

24 MIKE LINDELL (IN VIDEO CLIP): It's still open.

1 DR. SHIVA AYYADURAI (IN VIDEO CLIP): It's still, not  
2 only it's open, but we survived dismissal. And the other thing  
3 was, we also showed that when I put this out on Twitter, and  
4 said, look, the Secretary of State deleted ballot images,  
5 Twitter didn't do anything to me, but the Secretary of State  
6 contacted Twitter to shut me down along with the National  
7 Association of State Election Directors that came out.

8 MIKE LINDELL (IN VIDEO CLIP): Wow. Well, let me stop  
9 you right there. Because I want to say something.

10 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Yeah.

11 MIKE LINDELL (IN VIDEO CLIP): Did you hear the  
12 Twitter thing? All of you in this country and the world know  
13 my Twitter was taken down. You know why it was taken down the  
14 first time 20 some days ago, is because I put up the new  
15 evidence, which Dr. Shiva here, I'm going to tell him in a  
16 second, this new evidence that came out shows the timestamp in  
17 space of where you, you know, where the, who did it, what  
18 country did it, like China.

19 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Well, remember,  
20 we have two cases. First, we show we basically went into court  
21 saying the Secretary of State contacted Twitter, that means  
22 Twitter takes orders from the government. This is what we  
23 showed, Twitter takes orders from the crew.

24 MIKE LINDELL (IN VIDEO CLIP): And that's true,

1 that's 100%.

2 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Yes. Three  
3 hours of testimony - -

4 MIKE LINDELL (IN VIDEO CLIP): 100% [inaudible] Jack  
5 Dorsey - -

6 DR. SHIVA AYYADURAI (IN VIDEO CLIP): - - took orders  
7 from the Secretary of State of Massachusetts. This is what  
8 happens in countries like China, the government tells the  
9 corporations what to do. And in, in the United States, what  
10 came out in our three hours of testimony where I represented  
11 myself, no one wanted to take the swamp on a Massachusetts. So  
12 what came out was we have the Secretary of State's, the  
13 election director, and the communications officer saying they  
14 contacted Twitter to shut me down - -

15 MIKE LINDELL (IN VIDEO CLIP): Is that still open? Is  
16 that still open?

17 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Not only is it  
18 open, the judge gave me the restraining order and the case is  
19 open. And my other case to decertify, they tried to apply a  
20 100, 200 page motion to dismiss and the judge denied their  
21 motion. And that means look, MIT, MIT is in Massachusetts,  
22 right? There's a lot of computer people there. No one has  
23 rebutted my mathematical explanation showing that they  
24 multiplied my, my votes by point 666.

1 MIKE LINDELL (IN VIDEO CLIP): So 666, they multiply.

2 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Exactly. And  
3 the other guys by one point two.

4 MIKE LINDELL (IN VIDEO CLIP): You hear that?

5 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Well, I think  
6 one of the things that public needs to understand is federal  
7 laws, the Department of Justice is supposed to enforce them.  
8 You know, when we found out the ballot images were deleted, we  
9 inform the, what's the name Barr, right, and the local US  
10 attorney, and they've done nothing. So basically, this is what  
11 happens in third world countries where they have laws but  
12 nothing's followed. And if that's where we've gotten into it's  
13 a serious problem for this country, because the law - -

14 MIKE LINDELL (IN VIDEO CLIP): - - It's a serious  
15 problem, you mentioned Barr, I mean, he comes out and says  
16 there was no election fraud. You know, and here we have right  
17 here. You told him of some right?

18 DR. SHIVA AYYADURAI (IN VIDEO CLIP): I told him of  
19 some, I was - -

20 MIKE LINDELL (IN VIDEO CLIP): And was this before  
21 the election even?

22 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Before, but  
23 this is in October.

24 MIKE LINDELL (IN VIDEO CLIP): October?

1 DR. SHIVA AYYADURAI (IN VIDEO CLIP): I walked, so  
2 this is, yeah.

3 MIKE LINDELL (IN VIDEO CLIP): Bill Barr if you're  
4 watching, I mean, I mean, why would you say something like  
5 that when, yes, this is, this wasn't just election fraud. This  
6 was a historical election fraud. This was coming from a  
7 lecture from machines, from these machines, of biblical  
8 proportions, of historical proportions. And now this is, it's  
9 all going to get exposed. And I want all these, I want the  
10 senators, the congressmen, the government, the governors, the  
11 legislators, everybody needs to watch this show. And when you  
12 do, you know a lot of you could go wow, I never knew, I never  
13 knew. And that will be a lot of excuse for a lot of them  
14 because of our mainstream media and all the people. I can't  
15 believe the money spent to suppress this, you know, to  
16 suppress it. Though when you pop anything that popped up, boy,  
17 they were right on it, let's destroy him, let's destroy him.  
18 Like who was the last thing to pop up? Me. When I see this I  
19 popped up and how you destroy my platform, because everybody  
20 knows I'm out there. They've done everything they could from,  
21 from bots and trolls, to go after my integrity, Twitter. I  
22 mean, it's just been a massive attack. But then you know,  
23 you're right over target, right.

24 DR. SHIVA AYYADURAI (IN VIDEO CLIP): It wasn't

1 Twitter acted alone. We found the government contacting  
2 Twitter. Now this is a fundamental violation of the First  
3 Amendment. Political speech, government speech cannot  
4 supercede political speech. So I bet you you'll find out that  
5 some government official may have likely been involved in  
6 contacting Twitter.

7 MIKE LINDELL (IN VIDEO CLIP): Oh, they're big. Oh,  
8 yeah. I know Jack Dorsey who is involved. Jack, if you're out  
9 there, I mean, you did this to my movie a couple years ago  
10 with Unplanned where they shut Twitter down, Twitter shut that  
11 down for two hours when it, when it launched. I mean, you look  
12 at now we're getting into a whole segment there, where you're  
13 talking about how we all know, the social media, what they've  
14 done, you know, from Mark, from Mark Zuckerberg and, and Jack  
15 Dorsey. These platforms, the power they have along with the  
16 mainstream media, you know, what did they do when they took  
17 over, you talk about third world country, in Nazi Germany,  
18 they took over, you know, all your, any, in any country like  
19 that they'll take over your communications, you know, how are  
20 we going to communicate? You're hear one sec. You know, and,  
21 and this is where we're at, but we're going to get this out  
22 there, this show is going to be, this is what everybody's been  
23 waiting for. And, you know, if I, I encourage a newscast out  
24 there, if you're, all these journalists, and all the, and all

1 you guys that have been calling me, all for three weeks now,  
2 you never called me before, your, from your CNN's, to your New  
3 York Times, your Washington Post. All you guys have been  
4 calling non-stop every day, because you think you got some  
5 kind of, making up some dirt or something. Because Dominion,  
6 you're saying things about Dominion. I encourage you all, you,  
7 why don't you be a real journalist and take this story, and  
8 run with it. Be the first one to go, wow, this is real. You'd  
9 bet, maybe you'd be, it'd become the biggest outlet in the  
10 country by doing that.

11 DR. SHIVA AYYADURAI (IN VIDEO CLIP): Because the  
12 real crime scene in America is these computer algorithms.

13 MIKE LINDELL (IN VIDEO CLIP): And I'm going to tell  
14 you, that is the crime scene. And I'm going to tell you, this  
15 is their game too that these machine guys played, it's, like  
16 dominion. They went out there and a lot of these places I  
17 couldn't even go on the media and talk about these machines  
18 because they were threatened. I go on, I go on a news talk  
19 show and they go, we can't talk about that. I was just on one  
20 last night. You can't talk about that. Why not?

21 STEVE BANNON: Look, Mike, you know, Dr. Shiva, I  
22 think he's got, what, four degrees from MIT, this guy's, this  
23 guy's the proverbial man with two brains. He came up, he  
24 actually found out about this weighted race part of it, but

1 also this whole thing with Twitter and the TRO, walk us  
2 through exactly what he was talking about.

3           MIKE LINDELL: Well, it's very interesting because  
4 he's a guy that went back down, he knew he got cheated in his  
5 race and he did, he dug into the machines and he found the  
6 weighted race feature on the machines and he kept digging, and  
7 then he got it to brought it before a judge. Well, then  
8 the Secretary of State, when he put the evidence up, just like  
9 I did, you know, the evidence got taken down, his Twitter got  
10 taken down. So then he dug into it and sure enough, the  
11 Secretary of State did it. So the judge gave, ruled in his  
12 favor, gave the Secretary of State a restraining order. And  
13 what he's saying there, the government got involved in order,  
14 that's [inaudible], ordered a private company or company to do  
15 this. For all I know, you know, maybe that's what happened  
16 when they took mine down. Maybe somebody ordered Jack Dorsey  
17 to do it, I don't know. But all I know is that the, if you  
18 watch this here, you know, you've got people like Dr. Shiva, a  
19 great patriot, he's not going to give up. Now he's putting his  
20 whole life into this. It's not, it's not, you know, he lost,  
21 he's got a lot of better things to do but he realized the  
22 importance of this country. And with this weighted race  
23 feature on these machines, he knows it came through the  
24 machines and look at the suppression, look at, the government

1 tried to stop them by, by going to a social media platform and  
2 telling them to take it down. I mean, you can't get any more  
3 than that. I mean, how, and this didn't get big press. That's  
4 why when I talked to Dr. Shiva, this didn't make big news. Not  
5 many people know about it. I mean, it's one of, it's one of  
6 the cases open in the United States, and it keeps getting to  
7 the next level. That's pretty amazing.

8 STEVE BANNON: Yeah I think the reason, yeah I think  
9 it's the reason, the great thing of the film, you're bringing  
10 that up, and Dr. Shiva's a smart guy, he's relentless. But  
11 let's go to where the action is, that's in Michigan. Michigan  
12 is one of the most controversial states in this entire  
13 election. We're now going to go to Patrick Colbeck and Melissa  
14 Carone. Melissa Carone became a national hero at the hearing  
15 and also when Saturday Night Live mocked her during, about the  
16 Rudy Giuliani hearing. So let's go to Michigan, hear these two  
17 and then we'll come back after that, have Mike Lindell  
18 comment.

19 MIKE LINDELL (IN VIDEO CLIP): Okay, now we have  
20 Patrick Colbeck and he was a former state senator in Michigan.  
21 And Patrick, how are you involved with, what brought you here  
22 today?

23 PATRICK COLBECK (IN VIDEO CLIP): Yeah, well, I came  
24 from, as a result of my decision to be a pole challenger out

1 of the Detroit AV counting board, I did a marathon 25 hour  
2 shift from, starting on election night around five o'clock,  
3 all the way through the next day. So we witnessed all the fun  
4 - -

5 MIKE LINDELL (IN VIDEO CLIP): This was in Michigan.

6 PATRICK COLBECK (IN VIDEO CLIP): Yeah.

7 MIKE LINDELL (IN VIDEO CLIP): Where in Michigan,  
8 what county?

9 PATRICK COLBECK (IN VIDEO CLIP): At the Detroit AV  
10 counting board in Wayne County. A little background on me. I  
11 mean, I was former, when I was a state senator, I was actually  
12 the vice chair of the elections government, Elections and  
13 Government Reform Committee in the Michigan State Senate. And  
14 in addition to that background, my background as a Microsoft  
15 small business specialist and, and I did cabling design on the  
16 space station. So in other words, I'm familiar with election  
17 processes. And I'm familiar with network configurations. So my  
18 focus when I came at the Detroit AV counting board was, I  
19 wanted to understand specifically the handoff of vote tally  
20 information throughout the system. We did see evidence that it  
21 was connected to the internet - -

22 MIKE LINDELL (IN VIDEO CLIP): What was that  
23 evidence?

24 PATRICK COLBECK (IN VIDEO CLIP): Well, that, that

1 control center, they've already been, they've already admitted  
2 to the fact that that control center had computers that were  
3 connected to the internet. And we saw the actual cable routed  
4 from the wall of the, of the TCF center to the control center.  
5 And we have election officials that admitted that there were  
6 computers, in the control center that were connected to the  
7 Internet, and anybody with, worth their salt in IT land  
8 understands that if one computer is connected to the internet,  
9 they're all connected to the internet. You may say that it's  
10 air-gapped, you may say you have a firewall. There are people  
11 that eat firewalls for breakfast.

12 MIKE LINDELL (IN VIDEO CLIP): So what you're saying,  
13 you knowing that, so if it's connected to the internet,  
14 somebody out there could have hacked in and did the flipping  
15 of the votes.

16 PATRICK COLBECK (IN VIDEO CLIP): Yep. When you get  
17 into a case where you've got the same devices that are  
18 supposed to be capturing that vote tally, connected to the  
19 internet, or frankly, even connected to a large local area  
20 network, and you can't witness that handoff of vote tallies,  
21 you don't have that seal. So you may be thinking you're  
22 passing that information from point A to point B. But there's  
23 nothing to prevent it from going to point C and the internet,  
24 it's called a man in the middle attack.

1           MIKE LINDELL (IN VIDEO CLIP): Right. So that, so if  
2     you're on, if you're online, I mean that anybody could get in  
3     there and do that because they're intercepting that, it's  
4     interception. That's why you don't have, machines aren't  
5     supposed to be online in election, right?

6           PATRICK COLBECK (IN VIDEO CLIP): Yes, it's called  
7     man in the middle. And you wouldn't accept that if it was a  
8     traditional precinct. And you got that, you get that, that  
9     precinct results and it wasn't sealed, you'd be raising your  
10    hand saying something's rotten here.

11          MIKE LINDELL (IN VIDEO CLIP): Absolutely. I want to  
12    ask this though, because if you were there, did it slow down  
13    in the middle of the night when you were there?  
14    Like at 2 in the morning.

15          PATRICK COLBECK (IN VIDEO CLIP): Absolutely, yeah.

16          MIKE LINDELL (IN VIDEO CLIP): So it slowed down to a  
17    trickle.

18          PATRICK COLBECK (IN VIDEO CLIP): It was almost dead  
19    as the night. Yeah and that's when some ballots came in in the  
20    back door.

21          MIKE LINDELL (IN VIDEO CLIP): Well, now we're here  
22    with Melissa Carone. And you were actually hired by Dominion  
23    for November 3rd and 4th, just for two days. Right?

24          MELISSA CARONE (IN VIDEO CLIP): Right.

1 MIKE LINDELL (IN VIDEO CLIP): And they found you online,  
2 right? You had a resume online, you have an IT background?

3 MELISSA CARONE (IN VIDEO CLIP): Yeah.

4 MIKE LINDELL (IN VIDEO CLIP): Okay. So why don't you  
5 tell us, you know, tell us what happened.

6 MELISSA CARONE (IN VIDEO CLIP): So I was there to  
7 assist with IT work for Dominion. So what I was doing was just  
8 walking up and down the rows of the - -

9 MIKE LINDELL (IN VIDEO CLIP): By the machines. Okay,  
10 so there's, it's a tabulating machine.

11 MELISSA CARONE (IN VIDEO CLIP): Yeah. So I could get  
12 very close to these machines.

13 MIKE LINDELL (IN VIDEO CLIP): Okay, so then, so what  
14 about the, was, was that the only kind of machine?

15 MELISSA CARONE (IN VIDEO CLIP): No, there was, so  
16 the, on the stage there was adjudication machines in the front  
17 and the back and then on the sides there was the adjudicator,  
18 I'm sorry, the tabulating machines.

19 MIKE LINDELL (IN VIDEO CLIP): Right, both Dominion  
20 machines, correct?

21 MELISSA CARONE (IN VIDEO CLIP): Both Dominion  
22 machines.

23 MIKE LINDELL (IN VIDEO CLIP): Alright so you got to  
24 see what thousands of votes?

1 MELISSA CARONE (IN VIDEO CLIP): Thousands.

2 MIKE LINDELL (IN VIDEO CLIP): Thousands upon  
3 thousands of votes. Okay. What was on every vote?

4 MELISSA CARONE (IN VIDEO CLIP): Every vote that I  
5 saw was for Joe Biden.

6 MIKE LINDELL (IN VIDEO CLIP): For Joe Biden. When I  
7 heard this and I want to say, the, you seen, you worked how  
8 many hours? 20 - -

9 MELISSA CARONE (IN VIDEO CLIP): 22 straight hours -  
10 -

11 MIKE LINDELL (IN VIDEO CLIP): And then you came back  
12 for four hours?

13 MELISSA CARONE (IN VIDEO CLIP): Correct.

14 MIKE LINDELL (IN VIDEO CLIP): Out of all that time,  
15 did you ever see one Trump vote?

16 MELISSA CARONE (IN VIDEO CLIP): I never saw a single  
17 Trump vote. So when the ballots got to the tabulating  
18 machines, they would just put them through, put them, it's  
19 kind of like a printer, you would look at it kind of like a  
20 printer where the paper would come out normally, that's where  
21 they were put in. And it would end up as they were tabulated  
22 on the top of the machine. So these would jam constantly,  
23 constantly jam. And because these are mail-in ballots,  
24 creases, anything in them would jam this.

1           MIKE LINDELL (IN VIDEO CLIP): And when they jammed,  
2 what happened? This is very interesting.

3           MELISSA CARONE (IN VIDEO CLIP): When they jammed  
4 they would take the ballots on the computer, there was a  
5 computer in front of each person. It would say ballot number,  
6 you know, 20 jammed - -

7           MIKE LINDELL (IN VIDEO CLIP): Out of a group of 50.  
8 So the 20th ballot jammed, then what?

9           MELISSA CARONE (IN VIDEO CLIP): So it would say  
10 discard or rescan and the way they were supposed to do it is  
11 discard them and then rescan them, but they were not  
12 discarding these.

13           MIKE LINDELL (IN VIDEO CLIP): they use the same,  
14 let's say 30 went through it got stuck on the 30th. One,  
15 they'd put that number 30 at the top of the same 50 pack and  
16 run them through again.

17           MELISSA CARONE (IN VIDEO CLIP): Yeah.

18           MIKE LINDELL (IN VIDEO CLIP): so you're telling me  
19 that tabulator had no way to know it's just counting the  
20 number of like counting a deck of cards.

21           MELISSA CARONE (IN VIDEO CLIP): That's exactly what  
22 it is.

23           MIKE LINDELL (IN VIDEO CLIP): It's not, you can sit  
24 there run the same deck of cards through this tabulator over

1 and over and over and over again. Is that right? - -

2 MELISSA CARONE (IN VIDEO CLIP): - - Yeah, so one  
3 time through the night I approached my manager and I said  
4 this, this machine has a count of over 400 on it. I said  
5 what's going on here? And he, I said this is not right.  
6 There's, they should not go above 50. They shouldn't, because  
7 the batches are only 50.

8 MIKE LINDELL (IN VIDEO CLIP): Only 50.

9 MELISSA CARONE (IN VIDEO CLIP): And I said we have a  
10 huge problem here. And he said I don't, he pulled me aside and  
11 he said I don't want to hear that we have a problem. He said  
12 we are here to assist with IT work.

13 MIKE LINDELL (IN VIDEO CLIP): Now was this a  
14 Dominion guy?

15 MELISSA CARONE (IN VIDEO CLIP): He's actually a  
16 part-owner of Dominion.

17 MIKE LINDELL (IN VIDEO CLIP): Wow. Okay. Well, what,  
18 so 26 hours of watching ballot after ballot, Biden walking up  
19 and down these tabulating machines, not one ballot was for  
20 Donald Trump.

21 STEVE BANNON: Okay, Mike, look, Patrick Colbeck, the  
22 former state senator and Melissa Carone, the former employee  
23 of these two, they assert, you know, Colbeck says, hey, it was  
24 on the internet plus you got these vans coming in the middle

1 of night. And I know that Gateway Pundit, I think, put up some  
2 additional video the other day, but people there are saying  
3 that it didn't happen. Okay. And I think Dominion has been  
4 adamant they're not connected to the internet and Colbeck says  
5 they are. Also Melissa Carone, I think she says in 26 hours,  
6 she didn't see one vote for Trump. There are other people that  
7 just sit there and say she wasn't trained, she doesn't know  
8 what she's talking about and it didn't happen. What are you  
9 going to do to give additional evidence, backed up, about what  
10 the assertions of these two people are?

11           MIKE LINDELL: Well, I have all kinds of that and I  
12 can put it up on the website from both of these two. But the  
13 reason I wanted to put them in there was a couple of reasons.  
14 One is just to show you they were plugged in, and there's all  
15 kinds of evidence that he has as state senator. But with  
16 Melissa, it was, it was interesting to me, because she was  
17 hired by Dominion. So she was hired by Dominion and she was  
18 actually, when Michigan had that huge spike, which I've always  
19 wondered about, you know, this huge spike. One of the big  
20 fallacies of this whole election was that the mail-in votes  
21 were, were counted last. No, they were counted first. In  
22 Michigan, they were counted first. So everybody thought, the  
23 middle of the night, well, of course all these votes came in  
24 from the, you know, they were mail-in votes, they're for

1 Biden. No, that those votes came, one of the thing Melissa was  
2 allowed to do because she was a Dominion employee, there was  
3 only two of them there that were hired. They didn't get, they  
4 only gave them an hour training and all they were supposed to  
5 do is walk up and down the machines. So they could get close  
6 to the machines, where pole watchers couldn't, they had to  
7 stay six feet away. So she had, she had, it was interesting to  
8 me anyway, that she had access to see every single thing and  
9 she never seen one Trump vote because this was where they had  
10 to, They had to do the big spike you seen. So you know, and  
11 you know what, and I'm going to put up - -

12 STEVE BANNON: But, but you're, you're, you're  
13 committed to put up additional information that backs up what  
14 Melissa and former State Senator Colbeck are saying, right?  
15 You're committed to do that?

16 MIKE LINDELL: Right and see, I'm not here to prove  
17 all the, all that kind of fraud. I'm here to show you about  
18 machines. This shows just one other thing of what they did  
19 with the machines. And yes, I'm going to show all that  
20 evidence, I'll put it up on my website. But what they did,  
21 they filled up these fobs and they went down and they did a  
22 dump. They did a hundred and some thousand dump, boom, just  
23 put into the machines. You got, you do that online, you guys.  
24 I mean, if boom, that was just another way you can cheat with

1 these machine. So that's very important. But I will put all  
2 that stuff up on the website, we just, because I want to focus  
3 this show on the machine fraud, but I just wanted to put that  
4 in there because some of these things that were unexplainable,  
5 you're all going to know how they happened.

6 STEVE BANNON: Okay, I want to get to Matt DePerno, I  
7 think he's the Jimmy Stewart figure in this movie. Very  
8 powerful testimony. We're going to break into a couple of  
9 pieces, Matt DePerno, we're gonna stay in Michigan. Mike  
10 Lindell return with Matt DePerno in a second.

11 MIKE LINDELL (IN VIDEO CLIP): Okay, now we're here  
12 with Matt DePerno a friend and he's the lawyer that we all  
13 heard about this Antrim County. How did you get this county  
14 that you hear about and how do you even get involved in this?

15 MATT DEPERNO (IN VIDEO CLIP): Sure. Well, I know  
16 some people who live up in Antrim county and Antrim county is  
17 a small county up in northern Michigan, it historically votes  
18 roughly 65% Republican 35% Democrat. And in this case, it  
19 completely flipped on election night. Roughly 65% of the vote  
20 went to Joe Biden and 35% to Donald Trump. So people who lived  
21 up there knew that there was a problem, they knew that the  
22 results were not correct. And on the morning of November 4th,  
23 they actually contacted the Antrim county clerk and requested  
24 that she look into the results because they knew what had been

1 posted on the website could not be true. And through a series  
2 of events, people I knew up there, and a person named Bill  
3 Bailey, who's a patriot who lives up in Antrim County, and who  
4 knew there was a problem and wanted to challenge the results.  
5 They ended up connecting him to me and I filed a lawsuit. But  
6 what's important is in filing this lawsuit, we weren't seeking  
7 publicity. We weren't seeking fame. We just wanted to get  
8 results. We filed the name, in the name of a patriot named  
9 Bill Bailey and we challenged down-ballot school board  
10 elections. That's what he was most interested in, in learning  
11 about school board elections. Of course, he was obviously also  
12 interested in other aspects of the election, what happened in  
13 the presidential election and how did things flip, but  
14 primarily the case centered on local politics. If you look at  
15 certain townships like Chestonia township. Joe Biden got 197  
16 votes on November 3rd. In reality, he only got 93.

17 MIKE LINDELL (IN VIDEO CLIP): How do we know that,  
18 that he only got 93?

19 MATT DEPERNO (IN VIDEO CLIP): There's since been a  
20 hand recount.

21 MIKE LINDELL (IN VIDEO CLIP): A hand recount. So  
22 when did they do that?

23 MATT DEPERNO (IN VIDEO CLIP): They did a hand  
24 recount on November 21st and then again on December 17.

1 MIKE LINDELL (IN VIDEO CLIP): Right, right.

2 MATT DEPERNO (IN VIDEO CLIP): On December 17th  
3 actually, they told us they were going to do a full audit of  
4 the county, the Secretary of State did, but in in reality,  
5 they only did a hand recount again.

6 MIKE LINDELL (IN VIDEO CLIP): Okay. So on the  
7 recounts, we had 197. And then over here, Donald Trump had  
8 three, so that when, the real numbers were 93, and 197, is  
9 that correct?

10 MATT DEPERNO (IN VIDEO CLIP): That's correct. So you  
11 can see Joe Biden on election night got 197? He got Donald  
12 Trump's 197.

13 MIKE LINDELL (IN VIDEO CLIP): Right. Right.

14 MATT DEPERNO (IN VIDEO CLIP): So we can know, we  
15 know that that was a - -

16 MIKE LINDELL (IN VIDEO CLIP): This is 100% fact  
17 here.

18 MATT DEPERNO (IN VIDEO CLIP): 100% facts here.

19 MIKE LINDELL (IN VIDEO CLIP): Now what we're showing  
20 here, you guys, so everyone knows, these are all precincts. I  
21 don't know if you can see this here. These are all precincts.  
22 So let's just do this precinct, 392, this is done through the  
23 machines and Donald Trump got eight. What?! So here is the 392  
24 to eight. But the real number was 198 to 392.

1 MATT DEPERNO (IN VIDEO CLIP): And if you see here,  
2 Elk Township, Joe Biden got 392 in the election. In reality,  
3 those are Donald Trump's votes. Those were the 392.

4 MIKE LINDELL (IN VIDEO CLIP): Right they were just  
5 flipped. In order for that to be off, you do the conclusion  
6 which I would right now, 100%, how could that be off? It would  
7 be something wrong with what?

8 MATT DEPERNO (IN VIDEO CLIP): The machines.

9 MIKE LINDELL (IN VIDEO CLIP): The machines, the  
10 machines. And what we're showing here right now, what you're  
11 going to see, all this what we've been talking about, this  
12 massive machine election fraud that went on, where countries  
13 hacked into our election. And nationwide, this is one little  
14 county in northern Michigan, and these machines would do it  
15 right down to the precinct. Okay, what you're gonna see, this  
16 is the example we have that were, that was hand counted. And  
17 that, you know, the rest of the country, you know, didn't get  
18 to do that, they didn't have the luxury of being able to do  
19 that, you know. And so what I want to tell you all is this is  
20 the perfect example, just so you know, right down to the  
21 precinct level, what went on with these machine. I want to see  
22 one more here. So - -

23 MATT DEPERNO (IN VIDEO CLIP): So you can look at  
24 like, Kearney Township, Joe Biden got 744 on election night.

1 Those were Donald Trump's votes, he actually recorded 16 on  
2 election night.

3 MIKE LINDELL (IN VIDEO CLIP): So here's this county  
4 that traditionally, always is like, 65%, Republican 35%  
5 Democrat, correct?

6 MATT DEPERNO (IN VIDEO CLIP): That's correct.

7 MIKE LINDELL (IN VIDEO CLIP): Okay. So everyone in  
8 the county knew when these numbers came in on November 4th,  
9 they're going there's something wrong with the machines,  
10 everyone, everyone would think that, it wouldn't matter if  
11 you're Democrat or Republican. You're going, wow. And it's not  
12 like what, and they couldn't use the deviation and say, well,  
13 it was because of mail-in voting, because this is a, there's  
14 no huge cities in there like Detroit, correct?

15 MATT DEPERNO (IN VIDEO CLIP): That's correct.

16 MIKE LINDELL (IN VIDEO CLIP): Right. So I just want  
17 everyone out there to know this before you get into town. This  
18 is just a small county, Northern Michigan, and they ended up  
19 flipping, we had 15,718 votes.

20 MATT DEPERNO (IN VIDEO CLIP): 15,718 votes.

21 MIKE LINDELL (IN VIDEO CLIP): Votes. And 7,060 were  
22 flipped from Trump to Biden, is that correct?

23 MATT DEPERNO (IN VIDEO CLIP): And what's more even,  
24 it's even more - -

1 MIKE LINDELL (IN VIDEO CLIP): By machines right? It  
2 had to be done by the machines.

3 MATT DEPERNO (IN VIDEO CLIP): Absolutely by  
4 machines.

5 MIKE LINDELL (IN VIDEO CLIP): Okay.

6 MATT DEPERNO (IN VIDEO CLIP): If you look at the  
7 original vote count, 7,769 for Joe Biden and 4,509 for Donald  
8 Trump. That actually totals 12,278 votes by machine on  
9 November 3rd, that's the vote tally. That wasn't correct.  
10 Because if you look at the hand recount, it was actually 5959  
11 for Joe Biden, and 9759. For Donald Trump, which gets us to  
12 15,718 votes. So the question is, where did, where were the  
13 3,200 votes on election night. Why weren't they recorded?

14 MIKE LINDELL (IN VIDEO CLIP): Yeah, right. And that,  
15 but, but even, even with that, and we don't know why, we don't  
16 know why on that. We're, I'm here to show everyone out the  
17 facts and evidence that I've seen 100%. Here's 100%, this  
18 little county in northern Michigan, that look what the  
19 difference was, it was a net of 5,250 votes is that correct?

20 MATT DEPERNO (IN VIDEO CLIP): That's a net for  
21 Donald Trump.

22 MIKE LINDELL (IN VIDEO CLIP): That's a net for  
23 Donald Trump. There was 7,000, that's where you get the 7,060  
24 votes.

1 MATT DEPERNO (IN VIDEO CLIP): So what I want to show  
2 you here in the next slide is actually the number of  
3 registered voters, this is what you're getting to, the number  
4 of registered voters in the county is 22,082 votes and this is  
5 the total number of votes cast by machine on November 3rd,  
6 16,047. Now, of course, not everyone votes for the president,  
7 that's why there's gonna be some disparity. But you see what  
8 happened in Antrim County. On November 3rd, there were 16,047  
9 votes cast. And then on November 5th when they did a recount,  
10 somehow they gain 2,000 more votes. And we haven't got an  
11 explanation as to why that happened.

12 MIKE LINDELL (IN VIDEO CLIP): But we do have, but we  
13 do know that there was 7,000. If you were, if you were to say  
14 right now, and go, you know what we do know that 7,060, Donald  
15 Trump had 7,060 more votes net out of this county?

16 MATT DEPERNO (IN VIDEO CLIP): That's correct.

17 MIKE LINDELL (IN VIDEO CLIP): That's 100% fact.

18 MATT DEPERNO (IN VIDEO CLIP): 100% fact.

19 MIKE LINDELL (IN VIDEO CLIP): 100% fact.

20 STEVE BANNON: Look, Mike, you talk about  
21 providential, here you've got an attorney up in a small county  
22 up in northern Michigan, that really has a guy come and  
23 complain about a school board seat. This isn't even about the  
24 presidential election, but those folks knew something was so

1 extraordinary, this is a 65-35 county, and they know their  
2 neighbors. This is rural, you know, Northern Michigan, right?  
3 So they knew something was up right away but the authorities  
4 didn't want to deal with it. But he got a school, a guy just  
5 wanted to check the school board, right, because he couldn't  
6 figure out what went wrong. And that's why, remember, this is  
7 why I say Matt DePerno is a Jimmy Stewart figure, because he's  
8 the only attorney in the country that's really gotten in  
9 court, gotten a judge to issue an order to let him go in and  
10 do an actual forensic audit on the machines. What do you got  
11 to say about that, Mike?

12           MIKE LINDELL: Well, and that's, I've talked to Matt  
13 in depth and I said, you know, that's a little miracle that  
14 that happened. Otherwise, none of the machines would have got  
15 into, they were, judges all across the country didn't want to  
16 be the first one. They were blocked, they were going, somebody  
17 would get to them, talking about procedure. So everyone says,  
18 well, there was no evidence looked at. Yes, there was. In this  
19 county, and it's just like you said, here's a county, that's  
20 traditionally, all the way back, I looked all the way back,  
21 65% red, 35% blue, and all of a sudden, you got 15,000 voters  
22 in the county, you know, and 7,700, seven, over 7,000 votes  
23 got flipped, and you lose the, it's flipped on you and you go,  
24 you're talking to your guys in the coffee shop, go, how could

1 this happen? We're going who did you vote for? They could  
2 almost go around the county and say who they voted for. But  
3 here was, they were all wondering that. But the big difference  
4 was this school board election, all of a sudden, there's only  
5 supposed to be a couple people voting and I mean a couple, I  
6 think it was two, and 500 or 300 and some people voted in  
7 that. So they're talking to each other going, there's  
8 something wrong. So here they come in and [inaudible] this  
9 judge under the radar because they weren't talking about the  
10 presidential election. Otherwise, I guarantee you, the  
11 Secretary of State of Michigan, or somebody would have stopped  
12 this from even looking at it. Wonder why, we'll find out  
13 tonight. But I'll tell you what, Matt comes in there and they  
14 start digging into it and they're going, wow, you know, we  
15 want to be, do a forensic audit of the machines. So you had  
16 the great that, you know, Russ Ramsland, his, his company  
17 comes up there, they're the best, and they tried to even block  
18 that. But they were able to get what they needed out of that  
19 machine, the forensic prints of the machine, everything that  
20 happened that night. And here's an interesting fact, that flip  
21 of over 7,000 votes, now, I think I, I'm not going to be exact  
22 here, but it was like, probably the end results were 85 to 90%  
23 Donald Trump and 10 to 15% Biden. But the interesting thing  
24 is, what you're going to see at the end of this show, the last

1 half hour, you're going to see the cyber footprints we have  
2 now from the spyware matches what that was in that machines  
3 identical. And that is so key that they, and so now you take  
4 that machine and the interesting fact I want everybody to  
5 know, everyone says they, they did everything they could to  
6 discredit that county because they were afraid. Because if you  
7 take that county, and if it's wrong there in that machine,  
8 that blatantly wrong, which is in their report, the report  
9 that Matt DePerno, that they did and that Russ Ramsland, that  
10 came out of there, that I think they still have it under  
11 wraps. That, that is 100%, they should have looked at other  
12 machines, and they did.

13 STEVE BANNON: Okay, Mike, let's go, I think the next  
14 part is one of the most important parts of the film. I just  
15 want to say to tee it up, we're gonna go back to Michigan and  
16 Matt DePerno and Mike Lindell, about the forensic audit went  
17 on. Remember a couple of days after the election, what they  
18 said is that a clerk, I think, made a problem with the  
19 software, the way it was installed, or hit the wrong button.  
20 But this was all a clerical error, and that it could easily be  
21 unwound and oops, you know, we really know, knew we made it.  
22 But I think it's very important, this forensic audit by  
23 Ramsland's team up in Michigan, in Northern Michigan is very  
24 important. We have DePerno explaining it to Mike Lindell next,

1 we'll be back in a few minutes.

2 MATT DEPERNO (IN VIDEO CLIP): So after we filed the  
3 lawsuit, we, we at the same time, we filed the lawsuit, we  
4 also filed a motion with the court, asking the judge to allow  
5 us to take forensic images of the Dominion system, the  
6 Dominion voting system, and he granted that. And we then went  
7 in, and I believe it was December 6, and with a team of  
8 forensic scientists and data collection scientists, we, we  
9 captured the forensic images of the Dominion voting system,  
10 the master tabulator is what we call it, sitting in the county  
11 building, along with all of the CF cards, which are the  
12 program cards that run the actual software, along with the  
13 actual data cards or thumb drives that collect and tally the  
14 results in each precinct. We captured the forensic images of  
15 all of those items.

16 MIKE LINDELL (IN VIDEO CLIP): Okay, I want to I want  
17 to say something there. So the people, did you hire these  
18 people to do that?

19 MATT DEPERNO (IN VIDEO CLIP): Correct.

20 MIKE LINDELL (IN VIDEO CLIP): Okay and you didn't  
21 know them before this right?

22 MATT DEPERNO (IN VIDEO CLIP): We didn't know them  
23 before but people got us in contact with them.

24 MIKE LINDELL (IN VIDEO CLIP): Contact with forensic

1 experts on these particular machines.

2 MATT DEPERNO (IN VIDEO CLIP): That's correct.

3 MIKE LINDELL (IN VIDEO CLIP): So, so that's, I just  
4 want everyone to know that this wasn't just some, you know,  
5 hey, let's grab somebody from the county and look at these  
6 machines. These were experts..

7 MATT DEPERNO (IN VIDEO CLIP): These are people with  
8 real experience analyzing forensic software images. It can't  
9 be overstated enough, that these, these scientists, were also  
10 data collection experts. And that's important because what we  
11 saw in Antrim County, is the failure to properly follow  
12 procedures in securing the election machines, the tabulation  
13 machines, and securely transferring the votes, the chain of  
14 custody in this situation was completely tampered with. What  
15 we know for certain is that in the Dominion system manual, the  
16 manual tells us exactly how to connect the machines to the  
17 internet. The manual tells you how to do it.

18 MIKE LINDELL (IN VIDEO CLIP): Is it easy?

19 MATT DEPERNO (IN VIDEO CLIP): It's very easy.

20 MIKE LINDELL (IN VIDEO CLIP): Could a guy like me  
21 plug it in?

22 MATT DEPERNO (IN VIDEO CLIP): I'm certain you could  
23 probably figure it out. You can, the manual tells you how to  
24 connect the machine to the internet. In our case what we found

1 through the forensic study that was conducted was that on  
2 November 4th, at 11:03pm, system files, adjudication files,  
3 and other source system files were deleted from the Dominion  
4 system in Antrim county. We know that for a fact. They were  
5 removed, we don't know who removed them or how they gained  
6 access to remove them.

7 MIKE LINDELL (IN VIDEO CLIP): Okay, hold on, hold  
8 on. We do now. You'll see that later in the show.

9 MATT DEPERNO (IN VIDEO CLIP): What we know in our  
10 case, but we in our case, we don't know precisely because  
11 Antrim county and the Secretary of State have not given us  
12 that information. But we do know that those files were removed  
13 on November 4th at 11:03pm - -

14 MIKE LINDELL (IN VIDEO CLIP): What's the  
15 significance of that, that they're removed? What does that do  
16 to you as as trying to investigate this? What did that do?

17 MATT DEPERNO (IN VIDEO CLIP): Well, number one, I  
18 presume. And we've asked the Antrim, county prosecutor to  
19 investigate whether that was a crime to remove voting  
20 information from the system prior to the expiration of 22  
21 month period, which the items are required to be maintained.

22 MIKE LINDELL (IN VIDEO CLIP): When that's removed  
23 what, that means it was hard for you to do your audit?

24 MATT DEPERNO (IN VIDEO CLIP): That's hard for us to

1 review the forensic images to conclusively understand whether  
2 the machine connected to the internet because in Michigan, at  
3 least 38 other counties use the Dominion software. So if this  
4 is happening in Antrim County, and it was exposed in Antrim  
5 County because of the disparity, because there were only  
6 15,718 votes cast - -

7 MIKE LINDELL (IN VIDEO CLIP): You wouldn't notice  
8 this in a bigger city if it was that low a number.

9 MATT DEPERNO (IN VIDEO CLIP): Correct, if you were  
10 in Wayne County, the 7,060 votes flipped, you wouldn't notice  
11 it. My team of forensic scientists work tirelessly after  
12 December 6th, after we collected the forensic images for about  
13 a week, they worked very hard to review those images and put  
14 together a report. And because of a protective order that was  
15 in place in this case, I had to file a motion with the court  
16 asking the judge to allow us to release the report that we had  
17 prepared. And we did that, we did that on December 14th, the  
18 judge granted our request and allowed us to release what's  
19 called the Allied Security Operations Group. Preliminary  
20 summary version two, dated December 13th 2020.

21 MIKE LINDELL (IN VIDEO CLIP): Now is that public? Is  
22 that public?

23 MATT DEPERNO (IN VIDEO CLIP): It is public.

24 MIKE LINDELL (IN VIDEO CLIP): Right so, so this is

1 stuff that got put out there. And I guarantee you, it was  
2 probably put out there, somebody probably put it on their  
3 Twitter and I'll bet you it was gone. You know they've  
4 probably tried to spread - that's just my opinion, I had to  
5 throw that in there.

6 MATT DEPERNO (IN VIDEO CLIP): Well, I can tell you,  
7 it's been on my website at depernolaw.com, since December  
8 14th, and it has constantly been suppressed. For people who  
9 try to share the link on Facebook, or Google or through social  
10 media, it gets suppressed. And people are not allowed to share  
11 it. In some cases, they try to share it and a screen comes up  
12 that says that, that this information is not accurate.

13 MIKE LINDELL (IN VIDEO CLIP): Here you had a perfect  
14 report. I mean, that even the judge said you could put it out  
15 there, correct?

16 MATT DEPERNO (IN VIDEO CLIP): Everything we've done  
17 in this case has been permitted by the court in terms of the  
18 ability to release information. But what it is actually, it's  
19 information that if revealed, would show that the CEO of  
20 Dominion software, when he testified in front of the Michigan  
21 Senate, this information would show that he was not telling  
22 the truth about how the Dominion system works.

23 MIKE LINDELL (IN VIDEO CLIP): Wow.

24 MATT DEPERNO (IN VIDEO CLIP): And here's what we

1 concluded when we released the report. This is what it states,  
2 we conclude that the Dominion voting system is intentionally  
3 and purposely designed with inherent errors to create systemic  
4 fraud and influence election results. Now, that's not my  
5 words. That's the words of the forensic team that looked at  
6 the forensic images and came to a conclusion about what they  
7 saw. That's what's in the report.

8 MIKE LINDELL (IN VIDEO CLIP): They concluded that  
9 the only reason you would have a machine like this is if you  
10 wanted it to steal an election.

11 MATT DEPERNO (IN VIDEO CLIP): Correct, because what  
12 they also found is that this machine in Antrim County,  
13 generates errors at the rate of 68% based on ballots that you  
14 put in the machine. Remember this, when you take a piece of  
15 paper, and you vote on it, you think when you're voting that  
16 you're tallying your vote, and then you put that machine, that  
17 piece of paper into the Dominion tabulation machine, you know  
18 how that process works. And you think you voted, but you  
19 haven't voted yet, you haven't voted. And then until that  
20 machine actually tabulates your result in the system. When you  
21 put the paper in the tabulator, the tabulator takes that  
22 paper, converts it to data, and data can be manipulated. In  
23 the case of the way the Dominion system works, as I understand  
24 it, based on information given to me by my forensic team, when

1 you insert that paper ballot in the machine and when an error  
2 is tabulated and remember this machine tabulates them at 68%  
3 error rate those ballots, those error ballots, go to what's  
4 called adjudication. Adjudication is a process where someone  
5 else other than the voter, is able to look at that ballot on a  
6 screen and determine the voters intent and vote that ballot  
7 for the voter. And with adjudication in the way the Dominion  
8 system works. You can accumulate over the night, a number of  
9 ballots, but what I can tell you what's interesting is the  
10 2020 system log files are missing. But they are present for  
11 2018 and 2016. This happened at 11:03 pm on November 4th, what  
12 happened on November 4, the day after the election is at least  
13 in Michigan, this story broke across the state that Antrim  
14 County had flipped in this manner.

15 MIKE LINDELL (IN VIDEO CLIP): Okay, so it was such a  
16 deviation, everybody here, that's why we all heard about  
17 Antrim County. It was such a big deviation. It would be like,  
18 you know, the whole time you know, for decades or years,  
19 whatever you're going to hear 65% Republican and 35% and you  
20 flip. The whole townspeople probably having coffee going, what  
21 did you do? They probably did a recount just themselves at the  
22 coffee shops, you know. So now that makes sense. That's why it  
23 made big national news. We all heard about it.

24

## TRANSCRIBER'S CERTIFICATE

I hereby certify that the foregoing pages  
are a true, accurate, and complete transcript of the  
proceedings transcribed from a copy of the electronic  
sound recording to the best of our knowledge and ability.

IN WITNESS WHEREOF, I have hereunto set my hand on  
this 11th day of October, 2021.

TRANSCRIPT OF THE AUDIO RECORDING OF:

One America News Network

February 11, 2021

Vol. 3

TRANSCRIBED BY: THOMPSON COURT REPORTERS INC.

1 STEVE BANNON: Look in this small county in, in  
2 northern Michigan, it's kind of this gets to the heart of what  
3 the problem is here. First off, you've got the, you've got  
4 this 68% situation where it's, you know, it's the overcount of  
5 68%, or they're off by 68%. You've also got the situation  
6 where, you know, Allied is saying in the manual, that they  
7 show the manual, you've shown it that they're actually connect  
8 to the internet. Mike, is that where you guys believe that you  
9 caught Dominion and a bald faced lie? Because they say, hey,  
10 there's no possibility this thing could be hooked up to the  
11 internet. And yet here in the manual, you found there was  
12 caught, it can be connected to the internet?

13 MIKE LINDELL: Oh, no, it's just that's just one of  
14 many. I mean, it's just one lie after another with these  
15 people. I mean, I had to connect to the internet, their  
16 servers overseas, it just goes on and on. But you know, when  
17 you talk about this case, in particular, you just heard, you  
18 know, they're trying to, you know, they but right in the right  
19 in the thing based on our study, we further conclude that the  
20 results from Antrim county should not have been certified. I  
21 mean, this is right here that, you know, in their report, and  
22 instead of, and not only that, they should have just went to  
23 every other county, then. I mean, this is the most, if this  
24 doesn't show the whole country here, you know, here you had

1 evidence, you know, the one machine you got to open up and  
2 then everyone says, well, we're not gonna open up anymore. And  
3 by the way, they weren't online. Well, here it is, right here.  
4 They were online. I mean, they're not only online, but we've  
5 got, you know, they were used and he says it right here, when  
6 they went in there to check the cyber footprints or the to  
7 check these machines. They seen all that. They see that you  
8 couldn't have done, the things that couldn't be done. You had  
9 to be online. This is stuff that I asked I did my own due  
10 diligence I asked Russ, you know, Russ, I said, and his team,  
11 I said, so these machines would have to be online in order for  
12 what you see in there to be done. Absolutely. 100%.

13 STEVE BANNON: Okay, the other thing I want to get to  
14 is their report is, is it ever going to be fully put out? And  
15 here's the reason there are people on the left the people the  
16 mainstream media, the push back on the credentials of Russ. I  
17 think there were also some calculation mistakes done in  
18 Michigan by adding certain on some of the stuff I think some  
19 of the in the court filings, they had some mathematical  
20 mistakes, including some some districts in Minnesota. And so  
21 people have question Allied. But in their report, and I don't  
22 think this could be more brutal and more stark that says, and  
23 I quote, "we conclude that the Dominion Voting System is  
24 intentionally and purposely designed with inherent errors to

1 create systematic fraud and influence election results." Now in  
2 the state of Texas did their assessment when they decided not  
3 to choose Dominion Systems, they weren't this harsh. They were  
4 pretty tough on Dominion is that they had all these types of  
5 flaws, and they felt in their system that they just weren't  
6 tight enough. That's the way they are selected for the state  
7 of Texas here. They say they're designed to have these flaws.  
8 Now. Do you believe this? Is this one of the things that  
9 you're you're depending upon this Allied Securities analysis  
10 of Atrium County. Is this one of the things that you depended  
11 upon when you make these assertions that Dominion Systems is  
12 purposely purposely designed to actually have flaws so that  
13 you can actually flip votes? Of which they adamantly say,  
14 never happened, the system is not designed to do that. In  
15 fact, they say it's actually impossible to do that.

16 MIKE LINDELL: You know, you're right, Steve, it  
17 didn't. I wasn't 100% then. I could look there. I didn't see  
18 you know, I didn't see him plugged in with my own eyes. So I  
19 could be very subjective and gay. It says in a manual, you can  
20 go online, and you have thousands and thousands of affidavits  
21 from people that said they were online. You had people that  
22 ran them that said they were online. But that wasn't what I  
23 did my thing. What you're coming up here in this show, is what  
24 what I knew that they were online, and even being online. I

1 for me, I'm going okay, even if they were online, you know,  
2 did people to date steal our election? That would be my  
3 question. I'm going okay, you proved they were online. We all  
4 know that. But does that prove that they actually that they  
5 stole votes from servers overseas? No. But what you're gonna  
6 see here tonight is yes, they did. And this is when I went I  
7 kept getting Steve, I went like this with me. I kept getting  
8 here and more things I would dig into it. Like, you know, with  
9 the Rus Ramsland group I dug into them probably a month and a  
10 half before I ever got that piece of evidence on January  
11 ninth. So I'm digging into them, I'm going and then all of a  
12 sudden they find all this stuff in Antrim County, and I'm  
13 going wow, we got it. They showed the machines. All you got to  
14 do is just open up the machines in this country. And you're  
15 going to find all the these votes that were flipped and  
16 flipped, but you know what

17 STEVE BANNON: Your look, look, you're a tough  
18 business guy. You run your business people don't maybe not  
19 know this, but it's not just making pillows. It's the math and  
20 back that the math of sales

21 MIKE LINDELL: Right.

22 STEVE BANNON: and marketing. You're very detailed  
23 oriented when it comes to numbers. You're very detail oriented  
24 about getting to the bottom of when numbers change. Are you

1 confident that you've done the due diligence on Allied?  
2 Because I gotta tell you their report, and I think the  
3 audience needs to know, when is the full report coming out?  
4 Because I don't think the full report's out I think some parts  
5 are held back about this.

6 MIKE LINDELL: Yeah no

7 STEVE BANNON: People need to see this report, they  
8 need to read the report in DePerno, I think needs to become  
9 even a bigger public figure about this, because to me, this is  
10 one of the hearts of the cases.

11 MIKE LINDELL: Right. Well, you know, he was at, you  
12 know, his a small town lawyer guy that came in there to help a  
13 school board thing, and he's dealt with sudden thrown into the  
14 public eye. And you know, what, there is a report that stuff  
15 that came out their stuff, they held it, this court case is  
16 still going on, they can't put stuff out there, like you're  
17 all seeing. And the media used that to say all there's,  
18 there's this and this and this, the bottom line is they showed  
19 straight out that there were 7300 votes flipped, or whatever  
20 it was. I want to tell you this, too, you know, maybe I'm just  
21 seeing something,

22 STEVE BANNON: By the way, you don't believe I hang  
23 on, you don't believe what they're thing was it was a, it was  
24 a clerk or as a software situation, and the clerk didn't

1 install the right software. It didn't flip it, you don't  
2 believe what they came out and said, the official party line,  
3 you checked that out, and you don't believe that?

4 MIKE LINDELL: 100% I checked that out. Because when  
5 the report came back, I talked to them guys, I said, you know,  
6 this is what what do you mean, they say they're saying this,  
7 and this, these machines, they have a feature in them the  
8 weighted race feature. So you just set them now or you set them  
9 in you can and you can hack into them. But what I want to say is  
10 this, I'm gonna I'm gonna, I'm going to go a step further  
11 here, there might be a third miracle in here, because head,  
12 the Antrim County, let's just say that they would have said,  
13 okay, let's open up the machines in this country. Every single  
14 state would have been flipped, you'd have seen all the votes  
15 that were flipped, but you might not have seen who did it, and  
16 where all they came from the servers overseas. So this  
17 evidence that came out a little later. And when I got ahold of  
18 on January 9, when people reached out to me that, you know,  
19 that could be the third miracle. It all leads up to these  
20 machines getting found out, it's an attack on our country, and  
21 it's coming up here, but you know what Matt's doing right now  
22 the case is still open. And it's that, you know, all this  
23 stuff can be attached to that, and we can go out from there.  
24 This is what I want to tell the public. You know, that's kind

1 of that, you know, you got all these things out there. They  
2 say, well, where's our hope? Where's that? You know, what the,  
3 the hope is that you get this video that you get this  
4 documentary out to everyone so that everybody that the media  
5 can't suppress what we have here. We have good ongoing cases.  
6 Antrim County is still going on there that that was just the  
7 media telling we don't want to open up any more, you know, any  
8 more machines.

9 STEVE BANNON: Yeah, what I want to do Mike is go to the next  
10 section, because here's going to see Matt DePerno. You know, a  
11 small town lawyer, is going up against the entire system in  
12 these in the system is trying to disbar everybody that's  
13 contesting this. So let's, let's see the next section of the  
14 film, and then we'll come back and talk about it.

15 Okay.

16 MATT DEPERNO: Antrim County was not  
17 certifiable based on what the machine spit out on election  
18 night. And what we've requested is a full audit of the county.  
19 But we want all of the machines tested. We'd like to see all  
20 the machines tested across the state.

21 MIKE LINDELL: Right.

22 MATT DEPERNO: We'd like to see audits across the  
23 state of Michigan.

24 MIKE LINDELL: Right.

1 MATT DEPERNO: This is from the actual  
2 Dominion manual.

3 MIKE LINDELL: This the Dominion manual, yeah yeah.

4 MATT DEPERNO: This tells you know how to connect  
5 the machine to guess what?

6 MIKE LINDELL: The internet?

7 MATT DEPERNO: Yes.

8 MIKE LINDELL: Did everybody hear that?

9 MATT DEPERNO: This is another slide.

10 MIKE LINDELL: But you have to be on the internet in  
11 order to do this. So we're going to show you here, I thought  
12 these machines didn't go on there. That's what we were told as  
13 the public.

14 MATT DEPERNO: It's what we are told.

15 ERIC COOMER: If it's configured to print  
16 automatically, it'll print anywhere from one to, you know, 5, 10  
17 copies, however many are needed in the jurisdiction as well.  
18 This device can transmit directly. So that's all part of that  
19 closed polls process. You hit that button once it prints out  
20 the tapes, when it's done putting out the tapes, it will  
21 automatically transmit the results as well.

22 UNIDENTIFIED SPEAKER D: What is the vehicle for the  
23 transmission from the ICP? Is it cellular modem versus VPN?

24 ERIC COOMER: It is a cellular modem that

1 can be configured in a VPN. Right? And we are currently in  
2 Chicago Cook County, we worked with Verizon to secure that  
3 network. So we would have the same capabilities here.

4 UNIDENTIFIED SPEAKER D: Lucky. What wireless chipset  
5 slash modem does the hardware have?

6 ERIC COOMER: Uh we support a variety. So  
7 it's really up to the jurisdictions what technology they want  
8 to use what's compatible with their their networks.

9 UNIDENTIFIED SPEAKER E: Currently, in some  
10 jurisdictions, we're using basically a modem that is a 3g  
11 modem GSM but we can support multiple varieties of models.

12 ERIC COOMER: Including including latest 4G  
13 standards as well.

14 UNIDENTIFIED SPEAKER D: So the answers the next  
15 question is it 3g or 4g? Verizon AT&T or Sprint? I am assuming  
16 all?

17 ERIC COOMER: Yeah, all networks. Yeah, I  
18 mean, we actually transmit from the ICP in Mongolia as well.  
19 So we're not limited in networks

20 UNIDENTIFIED SPEAKER E: Out in Puerto Rico, there's  
21 three vendors, because the island is not covered by any by any  
22 of the vendors completely. So we use three different cellular  
23 vendors for some ICPs. With these vendor, Claro, AT&T and  
24 T-Mobile, I think, in the different parts of the island.

1 UNIDENTIFIED SPEAKER D: Everything gets complicated.  
2 MATT DEPERNO: This is another slide from  
3 MIKE LINDELL: Right.  
4 MATT DEPERNO: the Dominion Software  
5 manual,  
6 MIKE LINDELL: Right.  
7 MATT DEPERNO: That tells you exactly how  
8 to set up your system to connect to the internet. Those are  
9 important slides to see. And again, another slide from  
10 Dominion Voting Imagecast Central, which tells you as you can  
11 see, in the bottom corner here, it says number box number one,  
12 ensure that the workstation is connected to the network switch  
13 with an ethernet cable.  
14 MIKE LINDELL: Wow.  
15 MATT DEPERNO: What does an ethernet cable  
16 get you? To the internet.  
17 MIKE LINDELL: To the internet.  
18 MATT DEPERNO: These are this is all  
19 information that we've been able to look at,  
20 MIKE LINDELL: Right.  
21 MATT DEPERNO: from the actual manual.  
22 MIKE LINDELL: So what do we got here that looks like  
23 it was manipulated? What?  
24 MATT DEPERNO: Well that these spikes these

1 blue spikes throughout this show you where Joe Biden got a  
2 what we call injections

3 MIKE LINDELL: Right.

4 MATT DEPERNO: of votes at very specific  
5 times.

6 MIKE LINDELL: Right.

7 MATT DEPERNO: These these big ones on the  
8 left are November 3. So I'd be curious to see if your data  
9 that you have

10 MIKE LINDELL: It will.

11 MATT DEPERNO: Correlate to those.

12 MIKE LINDELL: Just so everybody knows what you're  
13 gonna see, when you see this spike, you're going to see a  
14 forensic footprint how that happened. And who did it, China?  
15 Yes. If you're on the internet, the bottom line is you can get  
16 you can cheat, you can do all kinds of things. And that's  
17 because otherwise you can't explain any of these numbers.  
18 Right?

19 MATT DEPERNO: That's correct. That's  
20 correct. The machine results don't match up with the hand  
21 tabulations.

22 MIKE LINDELL: To the real ballots, and once again,  
23 the you know, the purpose of this whole show, obviously,  
24 is to show everyone in the world that these

1 machines that this was the biggest fraud and the biggest crime  
2 I believe against humanity. I this is a crime against  
3 humanity. If we wouldn't be all talking about this now and  
4 this is all the truth is going to be revealed.

5 MATT DEPERNO: Michigan is under siege.  
6 Because this is what I'm dealing with. Right now. Dana Nessel  
7 is the Attorney General in the state of Michigan. She sent  
8 this tweet out not too long ago, and it says fun fact, lawyers  
9 who practice in Michigan are required to take an oath to  
10 support the Michigan and US constitutions, not to file unjust  
11 and or frivolous actions, or mislead the court. The spate of  
12 Trump lawsuits in our state violates each of these tenants, it  
13 demeans our profession.

14 MIKE LINDELL: Wow.

15 MATT DEPERNO: What she's calling for, and  
16 she said this publicly, she's calling for attorneys in  
17 Michigan, to be disbarred who file lawsuits in Michigan,  
18 challenging

19 MIKE LINDELL: This election.

20 MATT DEPERNO: the results of the election.

21 MIKE LINDELL: It got could you guys all hear this?  
22 This is what we're up against this Dominion these machines is  
23 the biggest fraud in election. They stole this. But now the  
24 truth is all going to be revealed. People like this lady, then

1 what's her name? Denny?

2 MATT DEPERNO: Dana Nessel.

3 MIKE LINDELL: Dana Nessel. And Dana Nessel how dare  
4 you put this out, you're supposed to protect Michigan in the  
5 US, this is what I'm doing. This is why I'm getting attacked  
6 this way. Everybody's getting attack. So anybody you know,  
7 here you are the attorney of that one of the few open cases  
8 where we have 100% proof. First, they try and suppress the  
9 actual report from it right here, right. And now they're  
10 saying now they're trying to just get rid of you.

11 MATT DEPERNO: That's true. So we have  
12 Michigan executive officials, who are now using the power of  
13 government to threaten those with whom they disagree with  
14 sanctions. They're threatening me and others with disbarment.

15 MIKE LINDELL: Wow.

16 MATT DEPERNO: So bringing forth evidence  
17 now, in our country, not only gets you the mockery of the  
18 mainstream media

19 MIKE LINDELL: I've been there.

20 MATT DEPERNO: Who refused to actually  
21 report on it, or the truth, but it now gets you ethics  
22 complaints filed against you if you are a lawyer.

23 MIKE LINDELL: Wow.

24 MATT DEPERNO: So what do we do about that?

1 When the Michigan Attorney General who is the chief law  
2 enforcement person in the state threatens those with whom she  
3 disagrees. You know what that is? That's tyranny.

4 MIKE LINDELL: Yeah.

5 MATT DEPERNO: That, you know, that is  
6 totalitarianism. So in our election system, and it's been  
7 going on for years after every election, people challenge  
8 elections,

9 MIKE LINDELL: Right.

10 MATT DEPERNO: That happens on a regular  
11 basis.

12 MIKE LINDELL: Yeah yup.

13 MATT DEPERNO: And that's part of our  
14 republic. That's part of public discourse. We're an eight were  
15 enabled to go in and have those discussions through the court  
16 system to challenge elections. And what Dana Nessel is saying  
17 is that you can't do that anymore.

18 MIKE LINDELL: Right.

19 MATT DEPERNO: Because if you try to do it,  
20 she will threaten you, she will try to take your license, and  
21 she will try to silence you.

22 MIKE LINDELL: Wow.

23 MATT DEPERNO: So her statements. This is  
24 no longer part of public discourse. This is chilling.

1 MIKE LINDELL: You think she's talking about all the  
2 lawyers? She's talking about you.

3 MATT DEPERNO: Well, we've talked about, I  
4 totally agree with you. She is talking about me.

5 MIKE LINDELL: Right.

6 MATT DEPERNO: And we've talked about the  
7 importance of public discourse.

8 MIKE LINDELL: Right?

9 MATT DEPERNO: Her tweet, as I've said,  
10 chills public discourse.

11 MIKE LINDELL: Yeah.

12 MATT DEPERNO: What it does, is it asks a  
13 lawyer to put their fear above the representation of their  
14 client in legitimate litigation,

15 MIKE LINDELL: Right.

16 MATT DEPERNO: That is tyranny.

17 MIKE LINDELL: Right.

18 MATT DEPERNO: That's totalitarianism. That  
19 is fascism.

20 MIKE LINDELL: She wants to scare you into doing  
21 nothing.

22 MATT DEPERNO: But it gets worse.

23 MIKE LINDELL: Right.

24 MATT DEPERNO: Around November 20, Dana

1 Nessel did an interview with The Washington Post. And in that  
2 interview, she threatened every Michigan legislator. And she  
3 said that any Michigan legislator with whom she disagreed  
4 with, any of them who challenged these election results, she  
5 would investigate them and seek criminal sanctions against  
6 them.

7 MIKE LINDELL: Wow.

8 MATT DEPERNO: That is saying to these  
9 Michigan legislatures, that if

10 MIKE LINDELL: Stay silent.

11 MATT DEPERNO: they, if they do anything,  
12 to bring forth the word of their constituents, to challenge  
13 election results, they could be charged criminally. It's  
14 asking elected officials, again, to put their fear above the  
15 word and the choice of their constituents.

16 MIKE LINDELL: Wow.

17 MATT DEPERNO: And you ask yourself, why  
18 did so many elected officials in Michigan refuse to look at  
19 the evidence that was presented there?

20 MIKE LINDELL: They did it out of fear.

21 MATT DEPERNO: Or time and time again, say  
22 that they haven't seen any evidence

23 MIKE LINDELL: Right.

24 MATT DEPERNO: of voter fraud,

1 MIKE LINDELL: Right.

2 MATT DEPERNO: or vote interference.

3 MIKE LINDELL: Right.

4 MATT DEPERNO: And you combine that with  
5 what we've now learned about the interview Dana Nessel

6 MIKE LINDELL: Right.

7 MATT DEPERNO: gave on November 21, telling  
8 elected officials they'd be charged criminally

9 MIKE LINDELL: Right.

10 MATT DEPERNO: And I say this right now.  
11 Everything that Dana Nessel has done in terms of threatening  
12 me and threatening state legislatures violates the Michigan  
13 rules of professional conduct, and she should resign  
14 immediately. It demonstrates that she's not fit for office.

15 MIKE LINDELL: Well, there's many like her. We know  
16 that this is going to reveal all the evil in our country. All  
17 the criminals in the country, all the ones that tried to  
18 suppress this, and that's just from social media like Jack  
19 Dorsey, like Mark Zuckerberg.

20 STEVE BANNON: Okay, Mike, I want to bring a couple  
21 things Eric Loomer, the the executive that works for Dominion,  
22 I believe he's actually suing people. I think he's brought  
23 some suits. But you say in here you actually I guess catch him  
24 on the video talking about the internet. And this is once

1 again gets back to the internet. Our Dominion machines set up  
2 to be on the internet where they attach the internet.

3 MIKE LINDELL: Right.

4 STEVE BANNON: I think that company adamantly opposes  
5 to talk, to talk to us about Eric Loomers. Is he even I don't know if  
6 you've been sued yet or not. You keep telling guys that hey,  
7 I've got the evidence so go ahead and sue me has Loomer  
8 contacted you has Loomer said that he's going to sue you with  
9 all the outbursts you've had about Dominion Voting Systems?

10 MIKE LINDELL: No. Dominion sends me letters like you  
11 have been warned. You know what I've told him to sue me, Eric,  
12 come on, please sue me

13 STEVE BANNON: Coomer.

14 MIKE LINDELL: Smartmatic all of you guys, because  
15 they won't. And you know, when they do go out and they do  
16 these fake lawsuits that they go in, they're suing someone  
17 they're trying to do that the only reason they're doing that  
18 is so that networks news networks, and everybody's afraid of  
19 talking about it. So they ended up oh we're going to get sued.  
20 If anybody talks about voter fraud and election fraud. Are you  
21 kidding? You know, this is I would love it. Come on, Eric.

22 STEVE BANNON: So by the way, it's Eric Coomer, I had  
23 a little typo there in the notes. Now I want to talk about  
24 Dana Nessel, the Attorney General. The pressure she's putting

1 on lawyers like DePerno. And also state legislators. I think  
2 they're, they're trying to disbar guys, they bring cases  
3 they're also threatening criminal sanctions. What is going on?  
4 Mike? Why are the elected officials in the state of Michigan,  
5 so afraid to drill down and to find out what's going on with  
6 these machines? In Antrim County? I don't understand. Explain  
7 that to the audience.

8 MIKE LINDELL: It's not explainable. I mean, I mean,  
9 you're trying to stop a court case from moving forward, that  
10 could affect every single person for the rest of our time here  
11 on Earth? I mean, this is crazy, that why would they do that?  
12 They're either trying to hide something. That's the only  
13 reason that can be the only reason. And it's not just  
14 Michigan, it's across this country and all these states that  
15 they do, but I'll tell you what she does that Dana Nessel to  
16 threaten this guy, this, you know, this guy that was a  
17 hometown lawyer that went in to help a school board election,  
18 because he knew that town knew that town came to him, they  
19 said, there's something wrong here. And and they trace it all  
20 right to the machines. And it's, you know, here it is, but the  
21 case is still open. So they are very threatened by it. It's  
22 really hard for them to keep that out of the news. So what  
23 does she do? Dana, Nessel sticks up these things on on her  
24 Twitter and stuff and saying, hey, we will suppress any

1 lawyer, we will suppress anybody that talks about it. And you  
2 know, I had a long talk with Matt about that. And I said,  
3 Matt, I said it's people like you and I, that are brave, that  
4 just keep going and forge ahead in spite of all that, because  
5 you know what? We have the Absolute Proof, but we will get  
6 that we will get to the Absolute Truth.

7 STEVE BANNON: Okay. Okay. So Mike, I got to ask you  
8 this, you say that the film is Absolute Proof. You're  
9 absolutely certain you're savvy business guy, you've gone  
10 through this. You've done your due diligence.

11 MIKE LINDELL: Yup.

12 STEVE BANNON: One of the questions people have is  
13 that the state of Michigan did, certainly I think they're 28  
14 other counties in Michigan, that use the Dominion Voting  
15 System, the state certified this and then the Republican Party  
16 controls, I believe the house in the Senate, they didn't fight  
17 it. In fact, they had this big fiasco down in Wayne County,  
18 they just let it all pass through. The votes did get  
19 certified, they got certified in a Republican house and state,  
20 as you know, and the senate just kind of stepped aside, let it  
21 be certified. So So tell the audience, how are they supposed  
22 to think of that one, this is a Republican legislature. Many  
23 of these counties are Republican, particularly a bunch of them  
24 are in rural areas, they all certified this. So

1 MIKE LINDELL: well, they're either they're either

2 STEVE BANNON: was Antrim County just a software  
3 problem, and how did that

4 MIKE LINDELL: Steve

5 STEVE BANNON: make the audience understand? How did  
6 everybody how did everybody certify?

7 MIKE LINDELL: Well, they're either scared, crooked,  
8 or are there we don't know. This is the big thing in this  
9 country we don't know. That's why when you come into town, you  
10 plan an attack on a country and you're China, and you're  
11 planning this attack and you've had five years or how many  
12 years to plan it, you got you got things figured out. What you  
13 know, just like a backup plan when they had when they had to  
14 get all those votes and all those deviations we see. The part  
15 that's unexplainable is just that. None of the legislatures  
16 did their job. But you know what, they use this that's what  
17 they use with this China virus they also use that that's a  
18 whole nother conversation. You know, they had things like last  
19 summer when I brought that before Anderson Cooper the  
20 MyOleander.com, they had the hydroxide clerga, all these  
21 things that could have maybe opened up our country or all  
22 these governors that are suppressing people. And in doing  
23 this, they use that for this election. They also use that I  
24 mean that but it sound explainable. There's a lot of

1 unexplainable things, but what do we say the we got the  
2 Absolute Proof and then the Absolute Truth will come out. That  
3 truth also will include a lot of people are going to sit  
4 before people and go, you know, courts or whatever and go, why  
5 did you do that? How, why would you certify something? Now I  
6 will give you no, I will give one thing because you know this,  
7 they suppress that machine vote and this or the machine so  
8 much that like I say it's just coming out now I heard about on  
9 January 9 where I had 100% proof. Now they have 100% proof in  
10 Antrim County. So what did they do it you know, whoever tried  
11 to stop it. I'm just saying that that's one of the things we  
12 will find out too because it's very unexplainable how they  
13 could all do that to the

14 STEVE BANNON: Okay.

15 MIKE LINDELL: American people. They did it to the  
16 American people, they did it to their own families, their  
17 neighbors and everybody there everybody played a role in this  
18 in some way. When the when you talk to these politicians that  
19 dropped the ball.

20 STEVE BANNON: Okay, well, that's something that's  
21 got to be resolved because this issue about the certification  
22 is still out there. You talk about the Chinese Communist Party  
23 the next. The next section is quite explosive. We're gonna get  
24 to Mary Fanning. She's an investigative reporter. I'm very

1 proud. This section talks about the Chinese Communist Party  
2 and their involvement. I'm very proud of being I think the  
3 first civilian that's ever been sanctioned by the Chinese  
4 Communist Party and happened four minutes into the Biden  
5 administration. When Mike Pompeo, Matt Pottenger for the  
6 National Security Council, Peter Navarro, and myself and  
7 others about 24 others were personally sanctioned by the  
8 Chinese Communist Party for our activities to confront and  
9 take down the Chinese Communist Party. Mary Fanning, a very  
10 well known investigative reporter joins Mike Lindell next for  
11 some pretty shocking revelations.

12 MIKE LINDELL: Well, everyone, this is the moment  
13 you've all been waiting for. What you're going to see now is  
14 100% proof that we had upon our country, the biggest cyber  
15 attack in history. And I'm gonna bring on Mary Fanning to  
16 explain how it all happened. And that show you the 100% proof,  
17 Mary, thanks for coming on.

18 MARY FANNING: Thanks, Mike. Today, we've been  
19 watching cybersecurity experts. And they've explained some of  
20 the things that happened in the election, some of the election  
21 fraud. But what we're seeing here is, if you look at this  
22 chart, is that there were cybersecurity experts who began  
23 collecting information on November 1. And b, so this was  
24 before, during and after the election, that they were

1 collecting documentation. In fact, they collected terabytes of  
2 information that document the election fraud before an  
3 intrusion into our election. This was collected as in 2,995  
4 counties in the United States. This was collected in real  
5 time. Alright, so if you go to the chart, what you will see is  
6 a documentation of foreign interference in the election. The  
7 first column, if you look at the chart that shows that on  
8 11/5/2020, at 7:43 and 38 seconds, we had a foreign intrusion,  
9 and it shows the IP address the Internet Protocol address,  
10 that is the number of that protocol address of the hacker that  
11 entered into our election. The second column is the owner or  
12 source of that IP address. That shows the China net in Beijing  
13 province entered the election, it shows an ID that is a unique  
14 address of a computer. That shows the exact computer, using  
15 that IP source, that entered into our election. The next is  
16 the target that's the IP target. That's the Internet Protocol  
17 address of the target. All right, then the next is the target  
18 state. In this case, it shows that it's Michigan. Where in  
19 Michigan? That's the next column. It shows that it's in Emmet  
20 County, Michigan. Then the ID target, that is a unique address  
21 of another computer in the United States that the hacker has  
22 gone into. And then it shows the method of intrusion. Now on  
23 some cases, you're going to see that they use credentials,  
24 that means that they have fake credentials, because there were

1 administrators that have been placed on the Secretary of  
2 State's computers. For false administrators, and other cases,  
3 it shows that they broke through the firewall. In some cases,  
4 they did both. Now, and the next time it shows whether it was  
5 successful, you'll see a Y. That shows that yes, it was  
6 successful. Now oftentimes, they're not successful, and they  
7 have to go back and try for another intrusion. And then it  
8 shows whether that's in fact, successful as well. Then in the  
9 final column, what you're seeing are votes changed. Now, in  
10 this particular case, when they went into Emmet County,  
11 Michigan, the votes that were changed was they stole 3,477  
12 votes from Donald Trump. That's what you're looking at. Now,  
13 as you go through this document, and you look at all the  
14 multiple intrusions into our election, what what you'll notice  
15 that over 60% of these intrusions come from China. So that is  
16 over 66% is what the number is. Over 66% of the intrusions  
17 into our election came from China. Why is this important?  
18 Well, some things were set in place, including some of the  
19 changes that took place in this country, particularly when we  
20 had the Wuhan virus or the COVID-19 virus hit this country.  
21 And we have a video well first Mike, do you have any questions  
22 about this chart and what it is showing?

23 MIKE LINDELL: Yeah, so what so what you have here is  
24 what each one of these is its own timestamp. That is 100%

1 proof because you have that not only where it came from, you  
2 had here it's basically you have their identification. You  
3 have that you know who they were attacking, their  
4 identification. This is what everybody would want. If you ever  
5 looked in and did an audit or wanted to look into a computer  
6 and look when it went on in cyberspace. This is what you'd be  
7 looking for. Correct?

8 MARY FANNING: This is forensic evidence of foreign  
9 footprints as I entered our election in a cyber warfare attack  
10 on our election, and then I chose exactly what they, you know,  
11 where did they come from? Which computer exactly, exactly the  
12 timestamp, exactly which computer they entered into, in what  
13 state which county, the the ID, the unique ID of the computer  
14 they entered into. And then it shows how they entered using  
15 false credentials or breaking through the firewall, or both.

16 MIKE LINDELL: Wow.

17 MARY FANNING: Were they successful the first time?  
18 The second time? And then it shows the votes that they stole  
19 from Donald Trump.

20 MIKE LINDELL: Right.

21 MARY FANNING: This is proof positive. This is  
22 documentation of a cyber attack. But it also is documentation  
23 of the footprints of those who entered our election.

24 MIKE LINDELL: Right. Right. And look at if everybody

1 notices here, every one. You don't think this was all put  
2 together in one big attack? Everyone with taught Donald Trump  
3 down, down down. This wasn't another country that wanted it  
4 the other way. This was the biggest attack in history. And you  
5 have and Mary you have we have pages and pages, right?  
6 Thousands of these pages have every every county right of  
7 every state or every single attack?

8 MARY FANNING: There are thousands of pages of the  
9 document and footprints, the foreign intrusion into our  
10 elections. We see this is coming from China, in many cases  
11 from Huawei, from Alibaba.

12 MIKE LINDELL: Right.

13 MARY FANNING: Cloud service from China Unicom, from  
14 YouCloud from China Mobile Tietong. You know, this also came  
15 in from Iran as well.

16 MIKE LINDELL: Right.

17 MARY FANNING: There, this is a foreign intrusion.  
18 This is the theft of our vote. But it also is documenting  
19 exactly the votes, the vote totals that were stolen from  
20 Donald Trump.

21 MIKE LINDELL: Right and this is

22 MARY FANNING: What we have heard,

23 MIKE LINDELL: Well, this is what I've been telling  
24 everyone. This is where you got if you add these numbers up,

1 when I when I said and I actually told the President, when I  
2 met with him, I said, you know, you actually won this election  
3 by almost 80 million votes for you, for Donald Trump to about  
4 68 million for Biden. And that's not counting all the other  
5 kinds of theft we talked about earlier in the show. This is  
6 the these are the real numbers that were taken off, and that  
7 were flipped. I mean, this is incredible everybody this is  
8 this is historical proof too. We not only have this is what  
9 we've all been waiting for. And Mary, you said there's a video  
10 too, we want to show.

11 MARY FANNING: Yeah, this is a documentation, the  
12 proof positive by cyber expert from in this country that began  
13 documenting the theft of our election.

14 MIKE LINDELL: Wow.

15 MARY FANNING: They put together the full  
16 documentation of every vote, beginning on November 1. So  
17 again, from before, during and after the election, they  
18 documented the footprints of the foreign intrusion into our  
19 election. That means that foreign adversaries really because  
20 this was an act of war to come in and steal the election from  
21 the American people and decide who our foreign adversaries  
22 were going to put in the White House to rule or to be the  
23 president of this country.

24 MIKE LINDELL: Right right right.

1 MARY FANNING: Now, there's a video and so that will  
2 show and if you are looking at the video, Mike?

3 MIKE LINDELL: Yeah, we're pulling we're gonna pull  
4 up the video here, Mary. Okay, here we go. We're just pulling,  
5 we just pulled up the video. Wow, what's going on here with  
6 all these lines?

7 MARY FANNING: Well, you're the video what you're  
8 watching is the surveillance system. In fact, this is the very  
9 surveillance system that was built by people inside this  
10 country within the cybersecurity battlespace that built some  
11 of this document, built some of these tools that were built to  
12 keep this country safe. But what you're watching is that every  
13 line on that drawing all those moving lines, they represent  
14 the IP addresses of what I just showed you on the chart. So so  
15 when you understand the hackers' IP address, and the IP  
16 address of the target and the votes that were stolen, every  
17 one of those lines that you're watching move across the chart,  
18 and showing whether they were successful and and how many  
19 votes they stole. That documents that. Every red line as they  
20 turn red, as they finish stealing the vote basically, the red  
21 lines are all China. So what you're seeing are the actual  
22 files being received and sent that that's a documentation of  
23 the real time theft of our elections.

24 MIKE LINDELL: Wow.

1 MARY FANNING: So every every line on the map,  
2 there's a corresponding line on the sheet. And the color and  
3 the line types represent the severity of the attack. Now red  
4 has been the most severe attacks, those lines are all coming  
5 out of China. Those are the most severe attacks on our  
6 election system.

7 MIKE LINDELL: Wow.

8 MARY FANNING: Now this is this exact information,  
9 the same exact type of information I should say, was presented  
10 to FBI Director, former FBI Director James Comey by a  
11 whistleblower in 2015. They knew, in fact that our election  
12 machines were open for hacking, it's important to understand  
13 that there are prismatic scoring algorithms, that they knew  
14 about, that entered the election, and they steal the vote, at  
15 the transfer points. So at the point where the election, the  
16 vote is leaving the Secretary of State's office and these  
17 machines, that is the point at which the vote is stolen at the  
18 transfer points. That's what you're watching those packets  
19 moving is is is that real-time documentation of the theft of  
20 the vote from inside this country. And then the numbers the  
21 last column, those document exactly the numbers of votes, it  
22 shows, and some of the cases Antrim County where the vote was  
23 stolen. And exactly the votes stolen at the exact timestamp of  
24 when they were stolen.

1 MIKE LINDELL: Right.

2 MARY FANNING: And the number stolen at that point.

3 MIKE LINDELL: So Mary, so what you're saying, how is  
4 it this is what what I already know. But I actually am  
5 learning a lot here as we go. What you're saying every one of  
6 these lines, let's say we did take Antrim County. And we took  
7 that. We could pull out the timestamps for that county. And we  
8 could show the lines the country that did it, we could show a  
9 line for every single hack or attack that we had in this  
10 election.

11 MARY FANNING: That's right.

12 MIKE LINDELL: Wow.

13 MARY FANNING: You're watching as those objects  
14 moving are the actual files

15 MIKE LINDELL: Right.

16 MARY FANNING: that are being received and sent.

17 MIKE LINDELL: These are box these are the squares

18 MARY FANNING: Every one of those

19 MIKE LINDELL: here that are that are being sent. So  
20 everybody out there, what you're looking at. I mean, this is  
21 the proof. So if any, if like Antrim County, that case still  
22 open, you just go here you go. Now you know who did it, how  
23 many votes flipped, when they did it, what time they did it,  
24 the computer came from, the country that attacked us. I mean,

1 this is, this is what I have been excited about. And I only  
2 seen one, you know, Mary, I only seen one little line of that  
3 would show the IP address that you know all that stuff that  
4 you're showing us. When I found out

5 MARY FANNING: Right.

6 MIKE LINDELL: that you had it forever, or that we  
7 had it or all these people had this for every single vote  
8 though every single attack. And whether it was successful or  
9 not. Look at right now we got up on the screen, Georgia is  
10 just getting attacked. It was just getting attacked up here at  
11 that moment in time. And I suppose, you know, they know what  
12 they're doing. They did the biggest attack right here. Look at  
13 everybody, Georgia and Michigan getting bombarded. There's  
14 I've My guess is that was probably like three or four in the  
15 morning, when they really needed them votes to be flipped.  
16 Mary, this is incredible.

17 MARY FANNING: Yes, because there is proof positive,  
18 there's documentation of all the foreign interference into our  
19 election, showing exactly who stole the vote, how they stole  
20 the vote, from which computers accessed, to our election to  
21 which computers they went into. So understand that  
22 cybersecurity experts that work for this country, put all this  
23 in place before the election even started to make sure that  
24 they caught all of this information, so that foreign

1 adversaries were not deciding our elections.

2 MIKE LINDELL: Absolutely. And what a blessing that  
3 they were there for us to catch all this and to get all this  
4 put together. And even to have these, you know, to be  
5 proactive, they were proactive, everybody and this what a  
6 blessing this is. Because we came this close to never knowing.  
7 And this is actually a miracle that we have all this Mary, and  
8 this is amazing.

9 STEVE BANNON: Okay, Mike, here, you're essentially  
10 saying because this is a basically a declaration of war, this  
11 would be the Chinese Communist Party coming directly to change  
12 the outcome of a presidential election. There can be nothing  
13 more serious than this. Now I want to go to what Mary Fanning  
14 put up. The chart looks nice as she's explaining it, but I  
15 don't know if people even home can follow because it's quite  
16 complicated. You know, given that the charges here are so  
17 severe, particularly against a foreign government now, and  
18 Mary Fanning is very well known investigative reporter but  
19 it's a very severe charge. Also, you have Dominion, I just  
20 want to, once again, they're adamant in every statement they  
21 make, they don't have servers in Germany, they don't have  
22 servers in Spain. None of their none of their data, or none of  
23 the, you know, the facsimile ballots, no ballots goes  
24 overseas. In fact, they say the balance, electronic balance

1 don't even cross county lines. They're that adamant about it.  
2 So let's go back to Fanning, that first chart. Are you do you  
3 have backup evidence because really still it's still an  
4 assertion of her's. When we see the we see the diagram but we  
5 see the chart but how are people and other professionals are  
6 you going to put the real material online so that outside  
7 groups can look at this and see if she's delivering the goods?

8 MIKE LINDELL: Well first of all that first thing  
9 with all those lines going back and forth that's not a  
10 computer simulated. That was that we took that or they took  
11 that and squished in a five day period and squished it in to  
12 that so you can see all that you know. When it takes up here  
13 from China and goes to Fulton County those are those are all  
14 real, inside the spyware thing that they that we that we that  
15 these guys have.

16 STEVE BANNON: Okay but are you okay fine fine that's  
17 they're putting that forward. Are you prepared to have like  
18 had Allied came and did the forensic audit in Atrim County of  
19 the Dominion machines what this is so explosive.

20 MIKE LINDELL: Now let me. Steve I'm going to have to  
21 explain.

22 STEVE BANNON: You're accusing you're accusing  
23 Dominion of being a tool of a foreign government that has  
24 essentially done I believe in information warfare, an act of

1 war against United States of America. And remember, I think  
2 the Chinese Communist Party would do anything to destroy  
3 America. However, this is so explosive. What are you going to  
4 do with Mary Fanning or other people to put forth out there  
5 that independent experts can check this out?

6 MIKE LINDELL: Right well here's why. First of all,  
7 let's now well let's go to the charts I just told you that  
8 thing inside the spyware. Okay, that that was switched

9 STEVE BANNON: Right.

10 MIKE LINDELL: The charts that go across these  
11 charts, the ones that actually come out of the spyware, the  
12 machine or software whatever it is, I haven't seen it, whether  
13 these kinks come out they're in they're in a language it's a  
14 footprint in time. And what we what they did is they took that  
15 exact the exact stuff that's on there so you know, it's from a  
16 computer from the spyware that the government has and then we  
17 put it into these things and when you see up there that Mary  
18 went through and said IP address, computer ID. Now what we've  
19 done or what these guys had did another group has went over  
20 and we went and validated all these computers that are in  
21 there. Not all of them but enough we're going wow this is  
22 real. That was something I wanted done. I wanted to done I  
23 wanted to see

24 STEVE BANNON: Okay hang on. Hey, but hang on. That's

1 not clear that's not clear from thing I'm

2 MIKE LINDELL: I'm getting there I'm getting there

3 STEVE BANNON: If you had another group valid

4 MIKE LINDELL: I'm getting I'm getting there

5 STEVE BANNON: Okay fine go ahead.

6 MIKE LINDELL: I'm telling you what I did for my due

7 diligence. So these computers --

8 STEVE BANNON: Okay.

9 MIKE LINDEL: -- all match up they're going and yeah  
10 you could have went around the world I guess and went and looked  
11 at computer ID, and you could have looked up an IP address and  
12 did that. What what the the things that back these up once  
13 they get before the court that the once with this would get to  
14 the Supreme Court then you're going to get the actual prints  
15 that have a timestamp on it, that have a government stamp on  
16 there, and these there's three or four people, actually three,  
17 that are whistleblowers. These are government intel people  
18 that work there. A couple of them still work there and they're  
19 not going to come out and say it right now and put it all up  
20 and say then they're going to know who did it these people  
21 these people are exposing everything. So when this gets before  
22 the courts

23 STEVE BANNON: Okay.

24 MIKE LINDELL: That's when it comes out I can't put

1 STEVE BANNON: Okay.

2 MIKE LINDELL: this stuff up with

3 STEVE BANNON: Let's let's okay

4 MIKE LINDELL: this stuff up there.

5 STEVE BANNON: Let's okay but okay what happens if it  
6 doesn't for a host of reasons look so far the track record of  
7 the courts taking this up, is that they're not taking this up  
8 for whatever reason they don't want to get involved they want  
9 to look the other way that's for people to make a decision why  
10 they're not. If this does not get into the courts, I think the  
11 next ruling's on the 22nd, are you prepared to put your  
12 independent the independent guys you had to take a look at  
13 this, can you start to get this information out here Mike?  
14 Because Mary Fanning claims this is the greatest cyber attack  
15 in world history

16 MIKE LINDELL: No no no this

17 STEVE BANNON: The greatest cyber attack in world  
18 history. So are you going to somehow try to get some  
19 additional information out there?

20 MIKE LINDELL: No, I'm claiming it's the greatest  
21 cyber attack and then you're gonna see people coming to write  
22 up this a general is going to validate us. He's going to val  
23 he's coming on right now where he's going to show you tell you  
24 what you just seen. But I will tell you this. I will say if

1 this doesn't get out no matter what. I will get it out there  
2 so the public can see it and I will tell you this, I will get  
3 it to demean a Dominion, Smartmatic I even if I have to  
4 go sue them, so that so this evidence gets has to get pulled  
5 out so that we save our country and save save by this was the  
6 biggest crime against humanity and and the world really.  
7 Everybody's watching this. So you can either save for me I can  
8 tell everyone out there. I went all in. There's not even a  
9 little sliver of wiggle room for anybody to discredit what I  
10 know and what we have.

11 STEVE BANNON: Yeah.

12 MIKE LINDELL: And I will say this, I will tell you  
13 this. There's a reason all the media there's a reason that  
14 they're crickets. There's a reason when I you know you put  
15 this out there that it gets suppressed. There's a reason they  
16 don't let us look at any more machines other than the one in  
17 Antrim County. There's a reason for that. This isn't about  
18 Democrats and Republicans anymore. This is about our country.  
19 What I have just shown you I have done my due diligence on  
20 and you know what, all of you yeah if you if it doesn't get  
21 through the courts and stuff somewhere in there but you  
22 wouldn't know if you wouldn't know it but government sheet  
23 like this came out. The government people know that the guy  
24 that's coming on next can tell you exactly what this is. And

1 this general he can tell you exactly what you just seen.

2 STEVE BANNON: Let me let me just do other things  
3 before I go to the next section. Colonel Waldron said very  
4 early on that the debt Dominion's, the private equity firm  
5 that owns Dominion has been bought by the Chinese. Will you  
6 also put all that information, allow Colonel Waldron put all  
7 the information out about the private equity firm? Because I  
8 think Dominion denies that too. Can you put out all the  
9 information, Colonel Waldron and said about the private equity  
10 firm? And one other thing is that Director of National  
11 Intelligence oh by by executive order, owed the president a  
12 full response from an executive order signed, I think in 2018,  
13 a full report of any foreign intervention in the last  
14 election. It was delayed. I think it came out in the last days  
15 of the administration and the CIA, you know, kind of held it  
16 back. But when DNI came out and said that China did intrude  
17 into the 2020 election, people were led to believe that that  
18 might have been the Wumao 50 Cent Army is some social media,  
19 not a cyber attack at this level to change the election. The  
20 DNI was, Congressman Ratcliffe is very close to President  
21 Trump. Don't you feel kind of squeamish when the Director of  
22 National Intelligence at least hasn't backed up that yes,  
23 there was Chinese involvement. But he certainly doesn't say  
24 that there was Chinese involvement on a cyber attack, as you

1 say, the greatest cyber attack in world history. Mike Lindell,  
2 what do you say?

3 MIKE LINDELL: I say that they, this is what this  
4 whole document or documentary is for. And what they had back  
5 down there, he said this, he probably didn't know how big this  
6 really was, you know, he probably didn't know. This is a this  
7 is everything we stand for the American dream, every single  
8 thing from here 'til eternity is right now, if we don't make a  
9 stand right now, because everything you've seen, and that  
10 through the way you just seen, this was the biggest cyber  
11 attack. And now people should know

12 STEVE BANNON: You're thinking that our intel, you're  
13 saying our intelligence services, you don't believe have the  
14 investigative apparatus, or even Mary says she's getting some  
15 of this from people inside the system.

16 MARY FANNING: Yeah.

17 STEVE BANNON: that they don't understand what Mary  
18 Fanning and her other investigators are talking about. They  
19 haven't got this information, or they're suppressing it?

20 MIKE LINDELL: Oh, there's it's absolutely they've  
21 suppressed it. I mean, I mean, come on, just look at with all  
22 the stuff we've seen here tonight. I mean, they're  
23 suppressive. Why do you think they're trying to suppress me? I  
24 mean, it would be very easy to say, come on, Mike, we'll open

1 up a machine and show you. Come on, Mike. None of your stuff  
2 is any good. Do you know when we put we put up Absolute Proof  
3 Facebook changed it from completely false to partially false?  
4 What that means is partially true. And I'll tell you what, if  
5 you got to think about that, everybody, if it's so bad, why  
6 wouldn't the news out there instead of saying for three weeks,  
7 Mike Lindell has no evidence he's a he's back on crap, blah,  
8 blah, blah. Instead all of a sudden it's crickets? It's  
9 crickets?

10 STEVE BANNON: Yeah.

11 MIKE LINDELL: On Friday, because you know what? And  
12 every one of yous got to get this out there cuz everything you  
13 seen there is 100% proof. And you know, what if you could say,  
14 well, Mike, show us more, show us more it'll all come out. I'm  
15 just telling you, this is real. These, you know, all this  
16 stuff will come out. But it's got to get to a court. And if it  
17 doesn't,

18 STEVE BANNON: Okay.

19 MIKE LINDELL: trust me, it will come out in the  
20 proof will come out and then the truth will come out. And  
21 we'll finally find out why were the questions you're asked and  
22 see, how come our own intel? How can the FBI, how can the DEA,  
23 you know, the Department of Justice? Why didn't anybody do  
24 anything? Right? You know, somebody put out the other day, why

1 did this MyPillow guy have to come up with all this? I did my  
2 own due diligence, but people came to me because I have the  
3 only voice left because everybody else got suppressed. That's  
4 it.

5 STEVE BANNON: Okay, we got an American hero coming  
6 on General McInerney. Let's hear what General McInerney has to  
7 say, to backup Mike Lindell. General McInerney.

8 MIKE LINDELL: And now we have with us General  
9 McInerney . Who is going to give us a perspectus on what we  
10 just seen. General. Thanks for coming on.

11 THOMAS MCINERNEY: Well, thank you, Mike, and thanks  
12 for what you're doing for this great nation. This is vitally  
13 important. You have just seen the most massive cyber warfare  
14 attack in the history of mankind. Now the founding fathers did  
15 not know anything about cyber warfare. But we do. And that's  
16 the important thing, you have seen just how it was  
17 orchestrated against our election system. And I took an oath  
18 of office 60 some years ago, as a plebe on the plains of West  
19 Point to support and defend the Constitution of the United  
20 States against all enemies, foreign and domestic. We now are  
21 seeing the largest domestic enemy we have in our history. And  
22 people must understand that. What happened? You spelled that  
23 out, it was driven by China. And they used the system that we  
24 have had because only that system could modulate and

1 coordinate the many simultaneous attacks that they used  
2 against us. And why this is so important is because our  
3 military, which I spent 35 years in the Air Force and ended up  
4 as a number three Man In The Air Staff, as well as heading up  
5 Vice President Gore's reinventing government for the entire  
6 Department of Defense, those two jobs simultaneously. We now  
7 are faced with something our military has never seen before,  
8 nor have the American people. We are going against globalists  
9 who are not interested in America. They are interested in us  
10 becoming a socialist communist state. They talk about  
11 progressiveness and, but progressivism is just the front door  
12 to communism. They want a global communist world. And you must  
13 understand that, America, it's so important. And it's so  
14 important that President Trump, who won 79 million votes in  
15 the election to 68 million for Biden, because we have and  
16 you've seen those exact numbers, he dominated, it was an  
17 awesome victory. And yet they turned it around. Foreigners.  
18 And we have not had one audit. This is the closest thing to an  
19 audit that has been conducted in America on this important  
20 election. The American people must understand what we are  
21 facing today. And that's why all of us here that you're seeing  
22 in this program are so focused. I could not understand was  
23 that the legislatures the judicial and the executive, meaning  
24 the FBI, the Department of Justice, the intelligence

1 community, have failed us with deep staters. They did not  
2 report this. This was the most massive cyber warfare attack.  
3 So did Cyber Command? Did the National Security Agency? Did  
4 the CIA? Did Department of Justice the FBI report this? No.

5 MIKE LINDELL: Well, General to put this in  
6 perspective then, you're 100% that this was the biggest cyber  
7 attack in the world in world history, correct?

8 THOMAS MCINERNEY: That's correct.

9 MIKE LINDELL: Wow. Well, thank you. And we're gonna see,  
10 it's gonna, I was telling everyone, General, when this thought  
11 wins, when this is all revealed, we're going to be, it's going  
12 to be a great uniter of all people in our country. And we're  
13 going to be in the greatest revival ever to bring our country  
14 back to one nation under God. Thank you.

15 THOMAS MCINERNEY: God bless you for what you're doing  
16 Mike. Thank you very much.

17 MIKE LINDELL: Thank you, General.

18 STEVE BANNON: So Mike, this is very scary. The  
19 general is such a renowned guy, he talks about domestic  
20 enemies had to somehow work on this. People want to know,  
21 where is your investigation going to go from here?

22 MIKE LINDELL: Well, I'm glad that a general that was  
23 in charge of all the nuclear weapons for the Pentagon is  
24 telling everyone exactly what I've been telling. This was the

1 biggest attack ever in history on our country, and you had to  
2 have a lot of domestic enemies here, that'll all be found out.  
3 What we need to go for from here is we need to reach out and  
4 get this out far and wide. Get the news out there. The real  
5 news, once everybody knows this, then we can you know. The  
6 Supreme Court, I've said throughout this film, the Supreme  
7 Court, they need, there's nine of them, they're all watching  
8 this at home. That's the last line of defense to protect our  
9 country. We need. This was an attack on our country. And we're  
10 right in the middle of it right now. So everybody has to just  
11 get it out there first. And then we they get the Absolute  
12 Proof out there. And then the Absolute Truth will be told. And  
13 now we have with us Terry Turchie. He's the former Deputy  
14 Assistant Director of Counterterrorism Division of the FBI.  
15 And you know, Terry, welcome to the show.

16 TERRY TURCHIE: Thanks, Mike.

17 MIKE LINDELL: And we've, we've just shown everybody  
18 in the world 100% evidence that this was an attack on our  
19 country and is still under attack by China and other countries  
20 through the use of these machines used in our election. I want  
21 to ask you, you know, where was the FBI? We have people out  
22 there. Where's the FBI or the DOJ during this whole time these  
23 last few months?

24 TERRY TURCHIE: Sure. Well, you know, a lot of former

1 FBI agents are asking that too, as well, Mike. They're asking  
2 where's the FBI been? They're responsible and accountable for  
3 trying to protect the country. That's what our  
4 counterintelligence money is all about. That's what our  
5 counterintelligence division is all about. And yet the  
6 question of where were they and where are they, I think  
7 probably could best be explained like this: the FBI is most  
8 likely been as compromised as the Democratic Party and the  
9 rest of the government. They simply didn't do the job, if they  
10 had done the job, all that you just showed in this program  
11 would have unfolded inside of a courtroom. And that's exactly  
12 what we should be doing right now we should be talking about  
13 the penetration of the United States government and government  
14 agencies

15 MIKE LINDELL: We've shown here too, is this is all  
16 people. This has been you know, what we shown today, this is  
17 another country, taking our country. I don't care if you're a  
18 Democrat, or a Republican, we are one nation under God, and to  
19 see what's I mean, I guess I'm very happy now that it's all  
20 going to get out to the country, and everything is going to  
21 get out. And like I said before, during the show, there's been  
22 nine supreme court justices out there now, watching this show  
23 and saying, wow, 100%, this was an attack, and we are still  
24 under attack by other countries, including China leading the

1 way. And they are they, you know, they've fraudulently stoled  
2 our election. And we have to, and, and then to see that how  
3 this could happen with the FBI and the DOJ, these people that  
4 were supposed to protect our country, including the Supreme  
5 Court, if you were still in the FBI, I guess what would you?  
6 What would you be doing right now when you just see all this  
7 100% proof here that this happened? In the FBI now what do you  
8 know, if they're out there? Shouldn't they be doing something  
9 now that this is all out in the open?

10 TERRY TURCHIE: We will be launching a major  
11 investigation of cyber activities.

12 MIKE LINDELL: These attacks, The people that you  
13 know, from China, and on down that who did it, they're very  
14 good at trying to bury everything to bury these deviations  
15 that came up, and then everything opened up, where everybody  
16 knows that this was stole, but now we know how and why. So.

17 TERRY TURCHIE: Well, certainly, and the purpose of  
18 an intelligence operation of this magnitude, whether it's this  
19 magnitude or even smaller is to is to conceal itself, and to  
20 be so hard to figure out that by the time you get to the  
21 conclusion, it's too late.

22 MIKE LINDELL: Right.

23 TERRY TURCHIE: And that's why it's very concerning,  
24 that the FBI that already knows and has the foundation of the

1 China threat, well, in its grasp, would try to write off or  
2 just not seem to understand

3 MIKE LINDELL: Right.

4 TERRY TURCHIE: how this would have been the next  
5 next logical step for them.

6 MIKE LINDELL: Right. Well, they weren't, they  
7 weren't proactive, but at least now we're, you know, we got  
8 we're gonna be reactive, and, and we got to be reactive first.  
9 And then we got to be proactive for the future. That when this  
10 all manifests out. I've said it before, that this is going to  
11 manifest into the greatest revival ever is going to unite our  
12 country, not divide us is going to be the great uniting, and  
13 we will once again be one nation under God. Thanks, Terry, for  
14 coming on. And God bless her and thanks for all you've done in  
15 what you continue to do for our country.

16 TERRY TURCHIE: You too, Mike, thanks for having me.

17 MIKE LINDELL: Thank you. Now you've all seen  
18 Absolute Proof of the biggest cyber attack in history. We  
19 right now, it's a takeover of our country, we all see it  
20 happening. And now you see the proof of where it came from and  
21 what happened. We all need to go out now each and every one of  
22 you and tell your friends, family, people, your social media,  
23 spread this out everywhere, and to show that they all need to  
24 watch this. And they all need to know the truth. And pretty

1 soon everyone's gonna see this, including nine supreme court  
2 justices. You're all there watching all nine of you. And you  
3 know what, I don't know what you can do. But I know you're  
4 there to protect our country. And everything has a precedence,  
5 everything going on. Well, this happened then. So we're better  
6 base on that. This is the precedent. What's going on now?  
7 What's going to happen now is going to change the course of  
8 our world and our country forever. I've been getting calls  
9 from world leaders, you know, they're looking at us what's  
10 going to happen over here? Ronald Reagan once said, America is  
11 the shining city on the hill, whose beacon like guides  
12 freedom, loving people everywhere. If the lights go out here,  
13 the lights go out everywhere. I want to say that God has had  
14 his hand in all of this. This has been on God's timing. And  
15 when we get through all this, we will once again be one nation  
16 under God.

## TRANSCRIBER'S CERTIFICATE

I hereby certify that the foregoing pages  
are a true, accurate, and complete transcript of the  
proceedings transcribed from a copy of the electronic  
sound recording to the best of our knowledge and ability.

IN WITNESS WHEREOF, I have hereunto set my hand on  
this 8th day of October, 2021.
